

Fulfillment by Amazon (FBA) Handbook Chapter 4

Amazon pride ourselves on helping Sellers capitalize on global business opportunities to reach out to more quality buyers. With this agenda in mind, Amazon has been continuously innovating and optimizing our global logistics system. For example, Amazon Global Logistics (AGL) is aimed to help Sellers ship their products, whereas Fulfillment by Amazon (FBA) is to help Sellers deliver their products into the hands of customers.

Let us now learn how to use FBA to expand our international businesses and attract more buyers. Let us make Global Selling easy!

4. Using Fulfillment by Amazon (FBA) Handbook

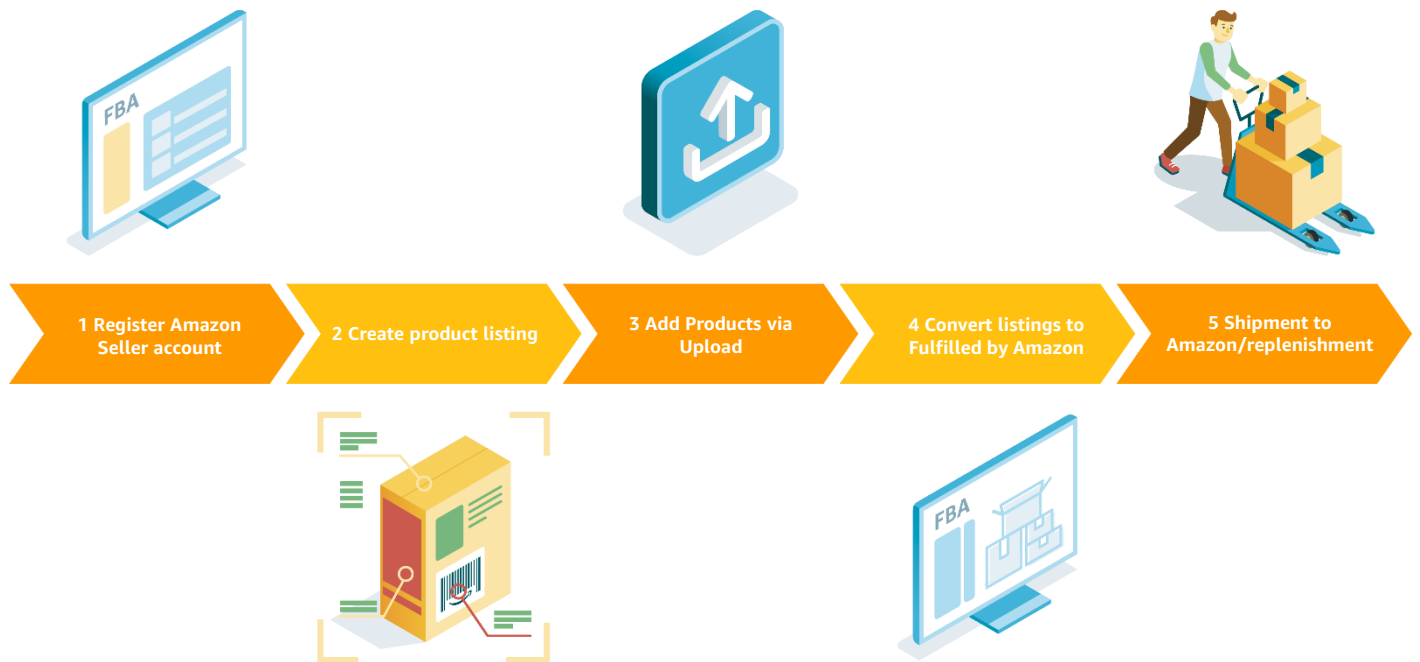

Having studied the earlier contents, do you have the urge to immediately start selling products? With Seller Central you can create and list your products, send/replenish Inventory to Amazon, track logistics information, reply to buyers' reviews, manage inventory and download analytical data and reports etc. So, what do they involve? Let us examine them one at a time.

4.1 Overview of FBA operation	3
4.2 Register Amazon Seller account	4
4.3 Create product listing	4
4.4 Add Products via Upload	12
4.5 Convert listings to Fulfilled by Amazon	17
4.6 Shipment to Amazon/replenishment	21
4.7 FBA Seller Operation, Management and Analysis	34
4.8 Terminologies and Definitions	39

There are five chapters in this course If you wish to learn about other chapters, please look for them under [Related Topics](#).

4.1 Overview of FBA Operation

At Seller Central you can complete FBA shipment process using the following steps:

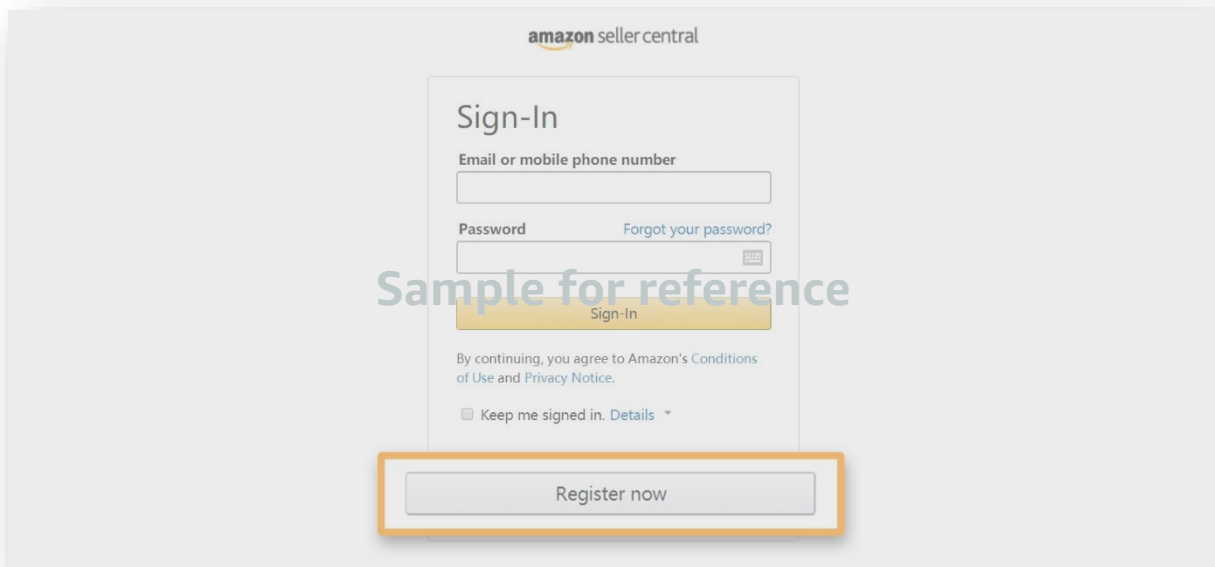

Before using Seller Central to carry out FBA operations you would first need to confirm the following:

- Whether the items shipped to fulfillment centers conform to Amazon's storage policies;
- The quantity of products shipped to fulfillment centers;
- The mode of shipment for front-leg logistics and logistics carrier;
- Whether product preparation is self-handled or by Amazon.

Does it not look simple enough? Let us now examine each of the steps involved.

4.2 Register Amazon Seller account

You will need to register an Amazon account to be able to use FBA. Click [Seller Central](#) to establish an Amazon account (please skip this step if you have already registered).

4.3 Create product listing

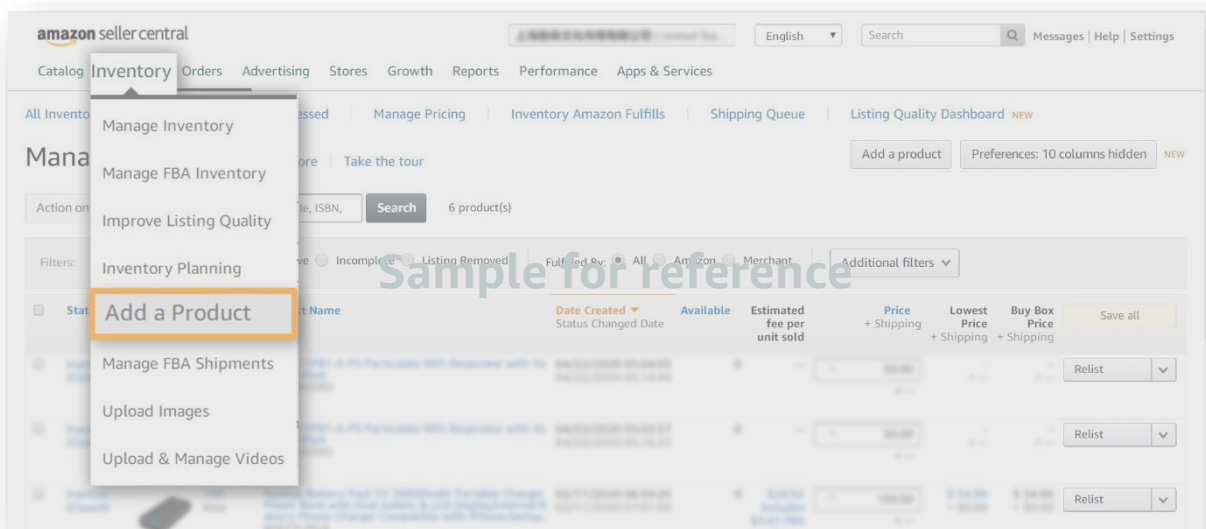

You will probably want to create and list your products as soon as you log onto Seller Central. But before this you will need to check whether Amazon already has the products that you want to sell.

- If there are such products, you can **select direct match** by entering the products' prices, quantities and other relevant details. This will help you save the time for creating product detail pages.
- If there are no such products, you will need to **create a new product detail page**, and add the product category and description etc.

How then will you be able to check whether the products that you intend to sell are already listed on Amazon? You can follow the steps described in the section below.

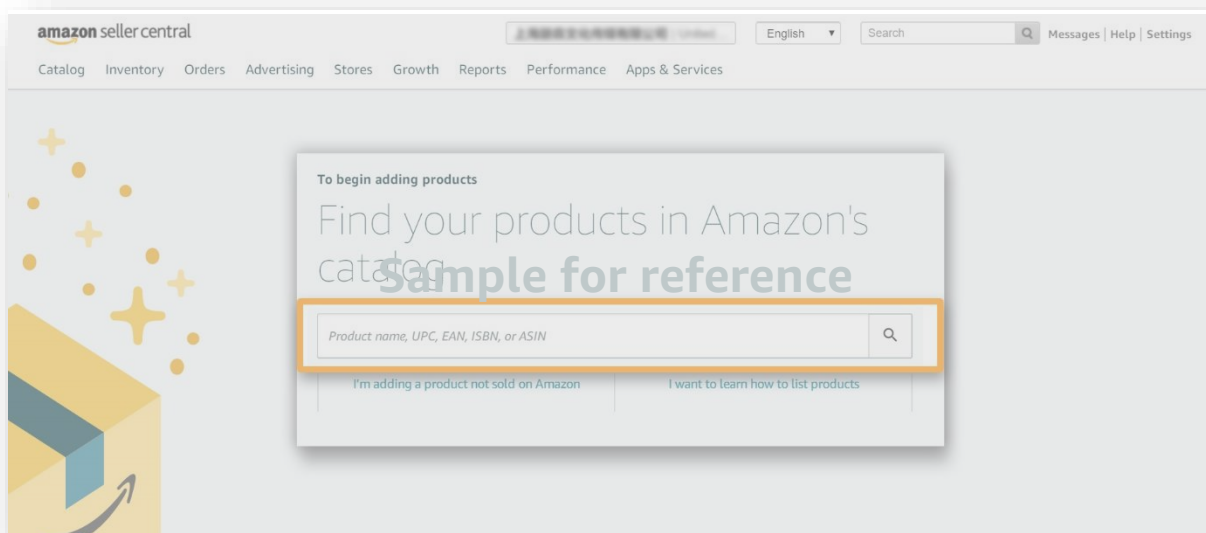

4.3.1 Confirming whether there are existing listings:

Step 1: Select “Add a Product” in the pull-down menu in “Inventory”;

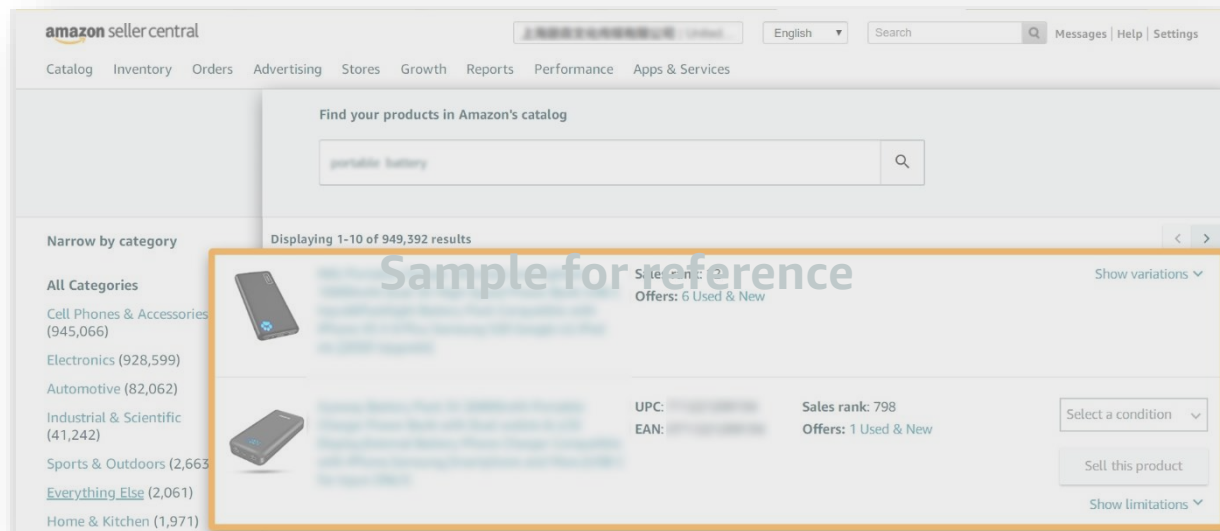

Step 2: Search the products that you wish to sell in the search column;

Note: Searches can be more precise if made using Product name (such as UPC, EAN, ISBN or ASIN)

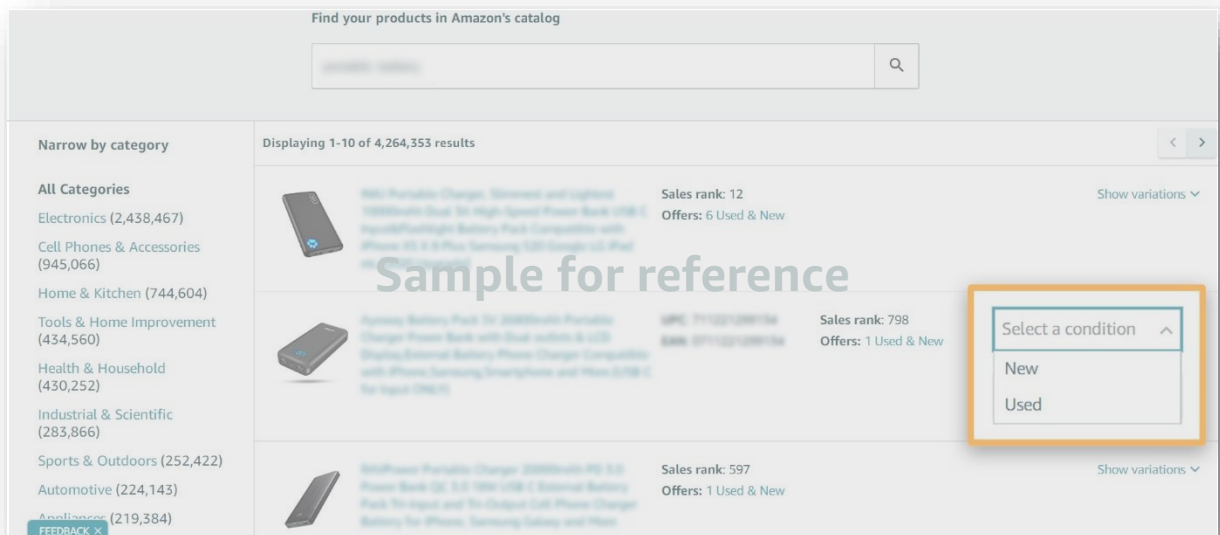

Step 3: Confirm in the search results whether there are products that you intend to sell.

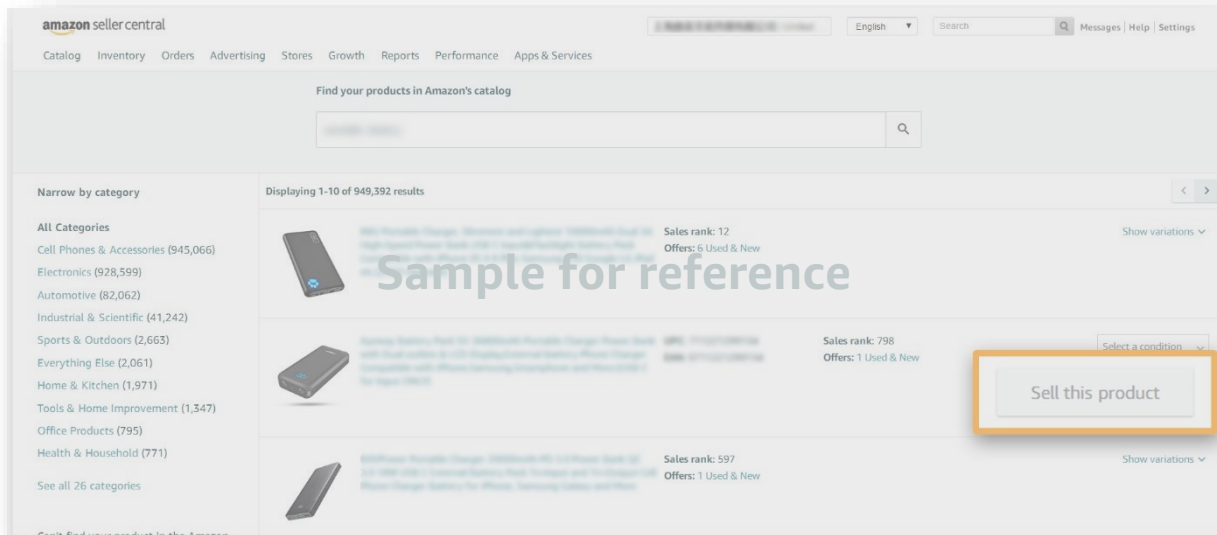

4.3.2 Add prices for existing products

After you have found the products that you wanted to sell, add their details according to the following steps:

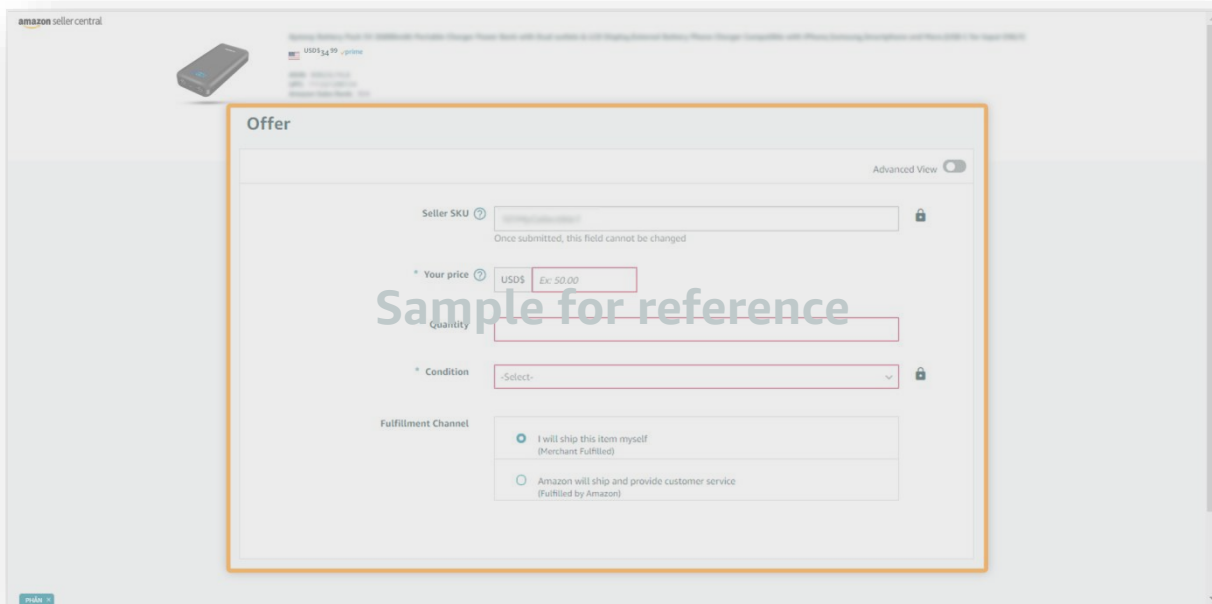

Step 1: Select your product status;

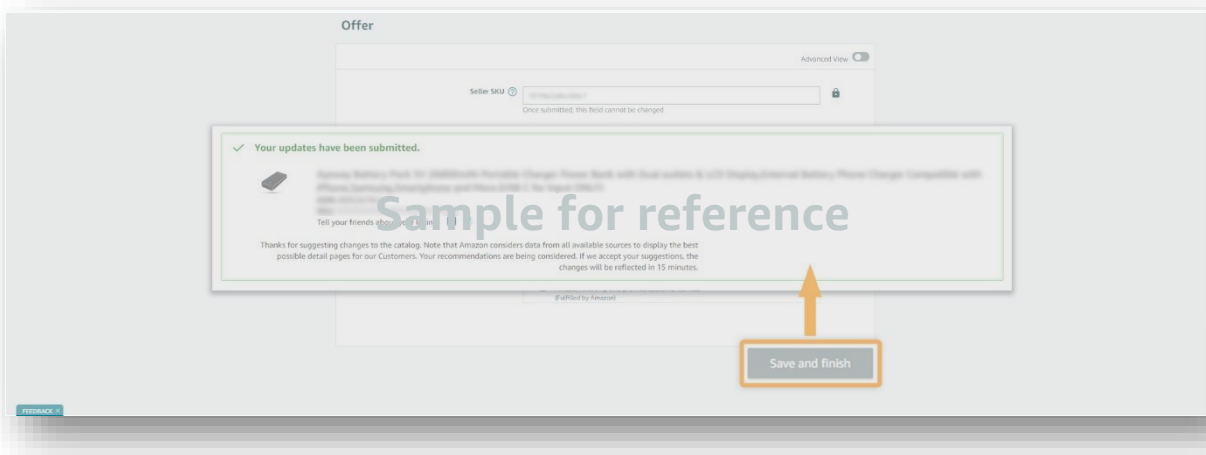

Step 2: Click “Sell this product”;

Step 3: You need to complete the prices in the product detail page, including its price, quantity, status and fulfillment options;

Step 4: Single click “Save and finish” after you have completed product information. You can now list the product.

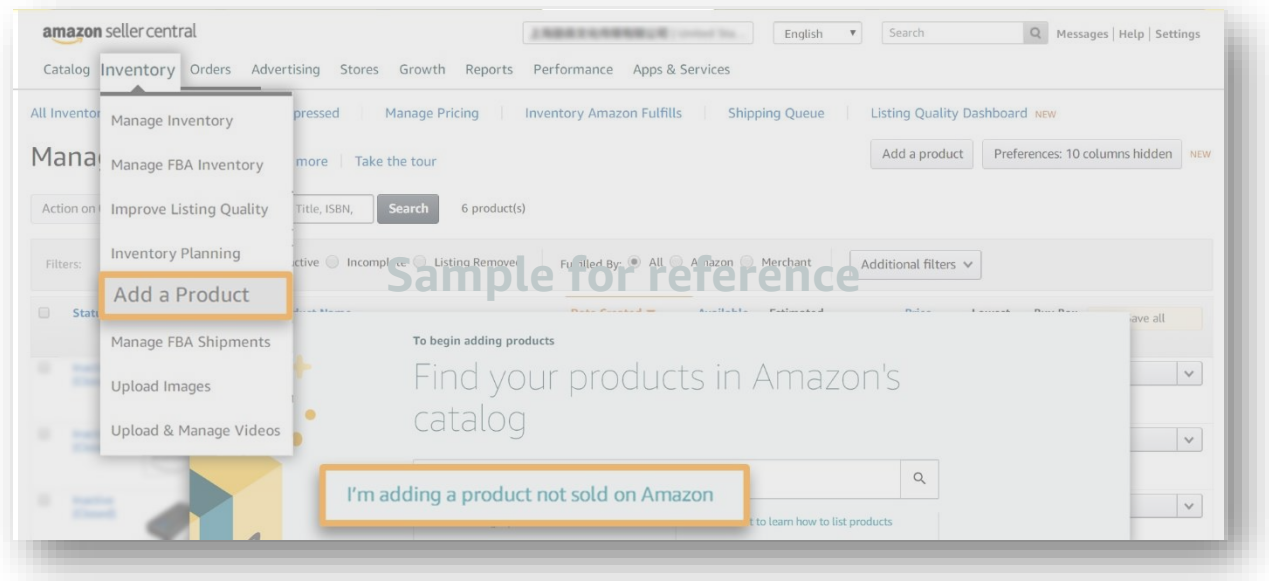

4.3.2 Create new products

If you have not searched the products that you intend to sell, you will need to create a new listing on Amazon. Before creating a new product listing, ensure that you provide the following information:

- **Product code:** The majority of products have an exclusive identification code such as UPC, EAN, JAN or ISBN. Product code allows you to match the product that you list with those already listed on Amazon, thus avoiding repeated listings as well as ensuring correctness of product detail page;
- **Price:** Price includes the product's status (brand-new or second-hand), price, quantity and shipping settings. You can update the information at any time.
- **Product details:** Product details include name, brand, category, description and pictures. Such details can let buyers have a better understanding of the product that you sell. They also allow you to highlight your product's features.
- **Keywords and search words:** Accurate and valid keywords can help buyers to more easily find you products. For more information please refer to [effective use of search words](#).

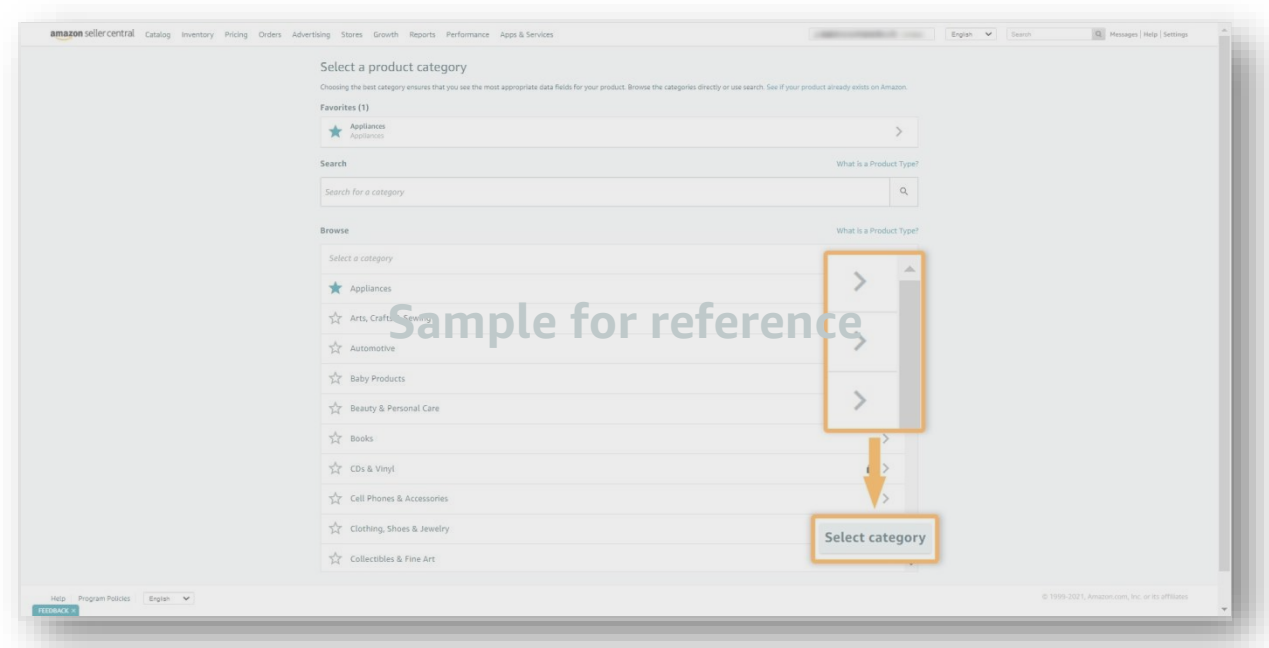

Now that the above information is available, we can begin to create new listing.

Step 1: Click “Inventory > Add a Product > I’m adding a product not sold on Amazon” to initiate creation of new listing;

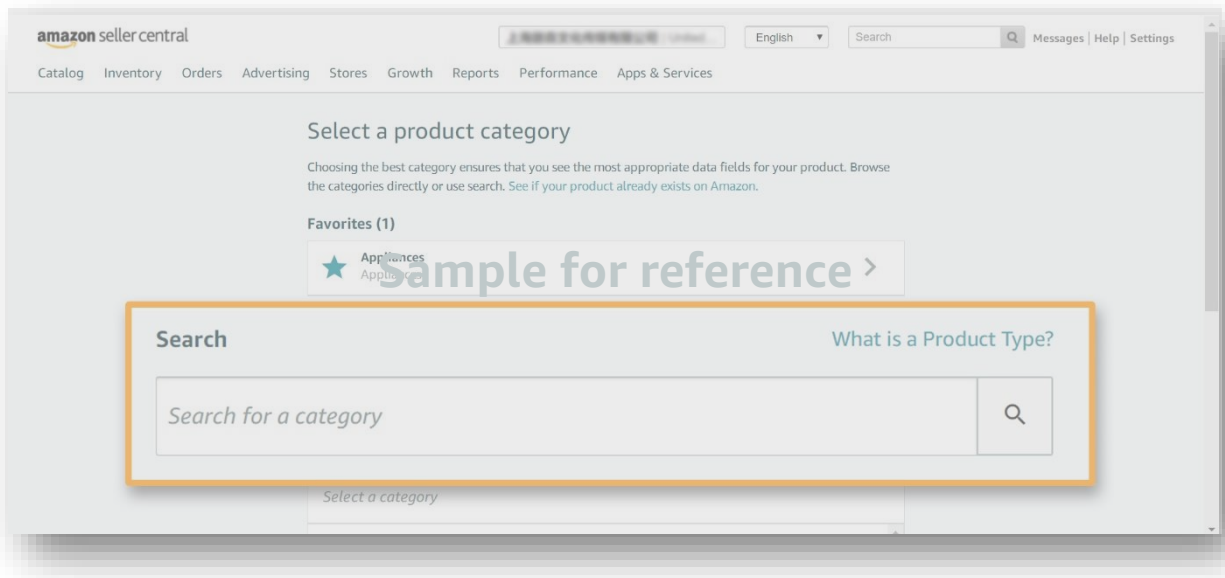

Step 2: Classify the product. Correct classification of the product will help buyers more easily find your product; You can select product category using any of the two methods below:

- Method 1: Select the appropriate product category in “Select category > Browse” option frame;

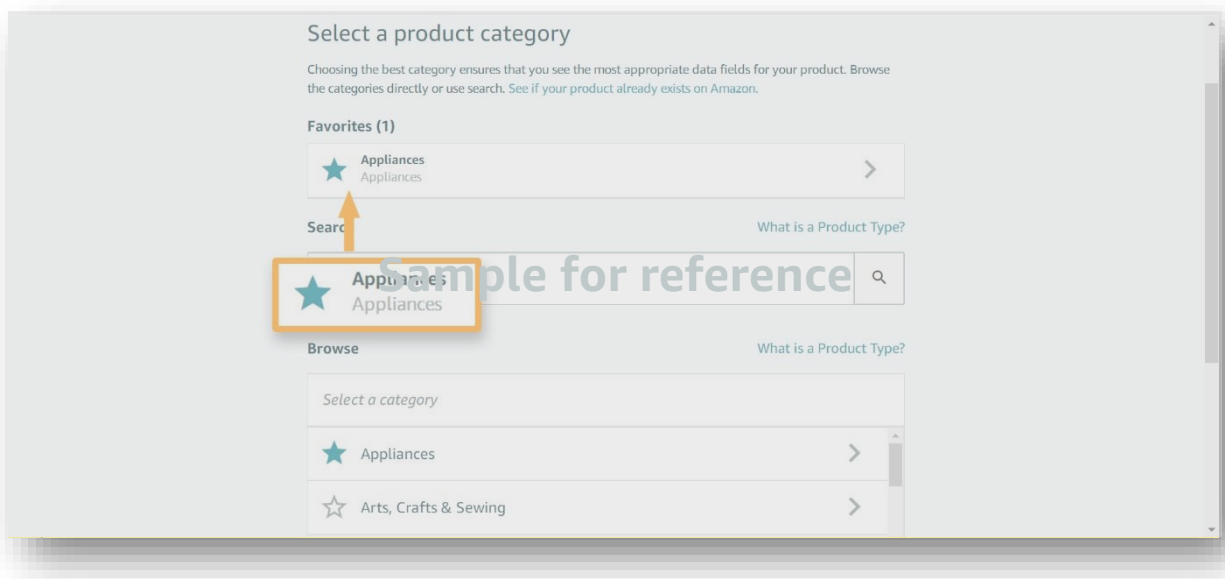

- Method 2: Enter product name in “Select a product category > Browse” option frame, then single click “Search icon” button. The system will find matching categories for your selection.

Note:

1. Single click the star symbol for the category enables you to save it as frequently-used category. The category will appear in the bookmark folder at the top of “Select a product category”.

2. We hope buyers can shop on Amazon without worries. Therefore we have set restrictions for certain special products and categories. You will need to add such listings after obtaining “approved request” on Seller Central. [Click here](#) for more details.

100%

Note: You can enter other relevant product information by selecting “Advanced view” option.

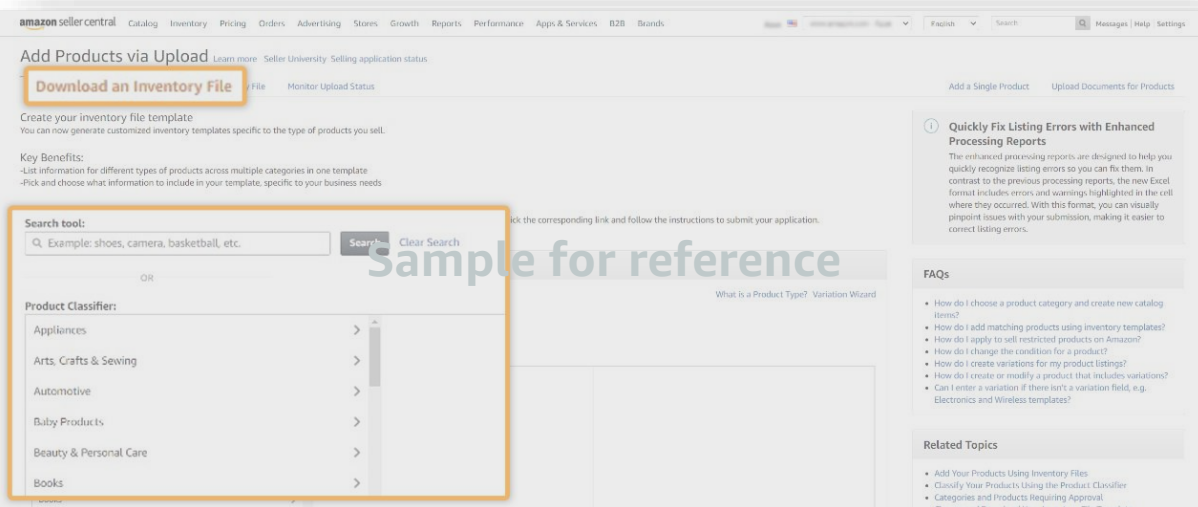

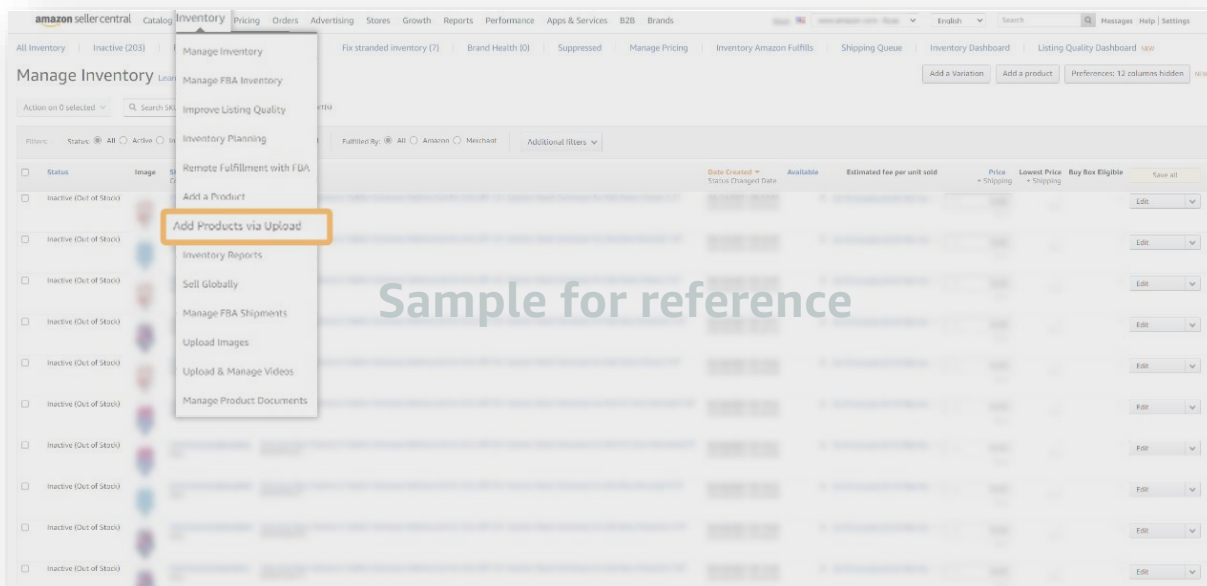

Your product listing is ready as soon as you have completed the above information. Your product will typically be listed on Amazon within 15 minutes. Buyers can see your listing price using “browse” and “search” functions. When you create a new listing, please use “browse” and “search” functions to check whether you can find the newly-listed product. If you are unable to find it, please refer to [Using search terms effectively](#) and [How do I find my products?](#)

4.4 Add Products via Upload

In the previous section you have learned about creation of listing by entering such information as product category, brand and prices. In this section you will learn how to list products in bulk by using inventory templates to list products with different Size and colors etc. Please note that this function applies only to Sellers who have joined **Professional Selling Plan**.

4.4.1 Creating inventory management template

Step 1: Click “Inventory > Add Products via Upload > download inventory document” on the menu. Select the category of the product that you wish to list by using “Search tool” or “Product Classifier”. Please note that for special product and categories you would need to obtain “Approved request” on Seller Central.

Step 2: Select the appropriate template. There are three templates to choose from:

- **Simplified version:** Includes only relevant fields for the products and essential attributes for listing to be created on Seller Central.
- **Advanced version:** Includes all fields (essential, priority and optional attributes) pertaining to the selected product;
- **Self-defined version:** In addition to essential attributes, you can also select applicable attribute groups, which is a collection of attributes relating to the product.

Note: Regardless of the type of template selected, it can hold only information of a maximum of 2,000 units of product.

Step 2: Select marketplaces

Select from your available marketplaces below. Selecting additional marketplaces will add offer data columns such as price for each. Product data you provide will apply to the listing in the marketplace in which you submit your template. If a detail page for your listing does not yet exist in the other marketplaces, Amazon will attempt to translate and create it automatically, which can take up to 48 hours. If you use Build International Listings, please review your connection settings as they may overwrite selections made in individual file uploads.

☐ Americas

4.4.2 Complete and save inventory template

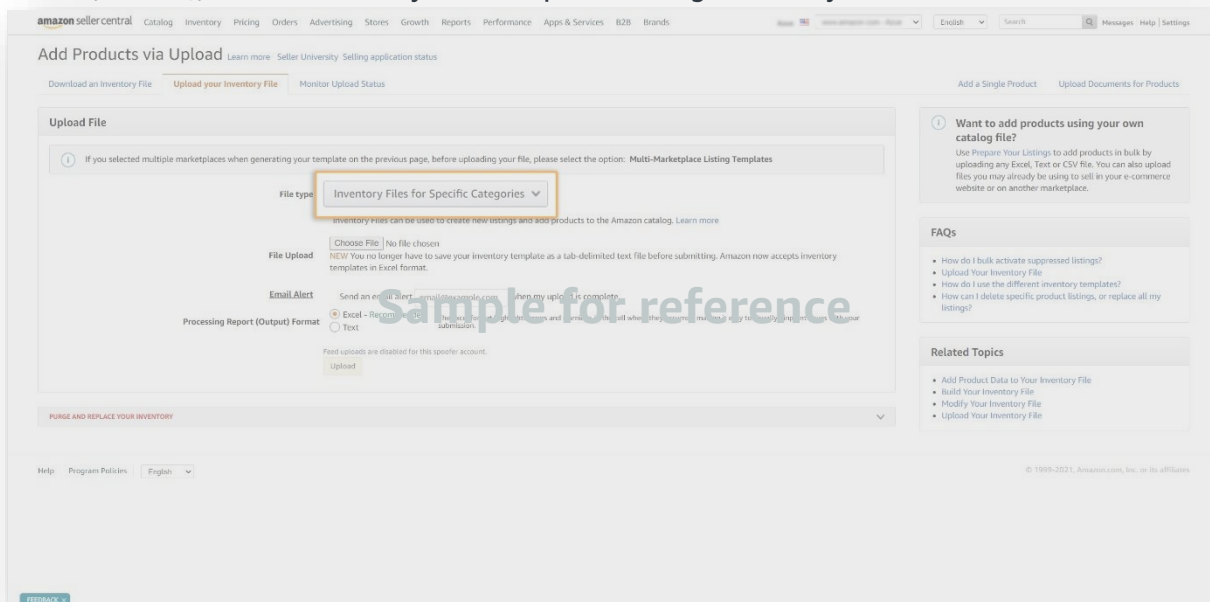

Follow the instructions for the inventory template and enter the products' details. The fields with label in bold letters are compulsory. After you have completed the document, save it in Excel format. You have now completed production of inventory template.

4.4.3 Upload your inventory file

After you have completed production of inventory template, first check whether it is correctly completed on Seller Central, then upload it again to inventory listing.

Step 1: Check you document. Click on the menu, "Inventory > Add Products via Upload > Upload your Inventory File". Select "File type" under "Upload File". If your products are non-media type (books, music, videos), select "Inventory File for Specific Categories" only.

Step 2: Click “Choose file” to upload your inventory file in Excel format.

Feedback

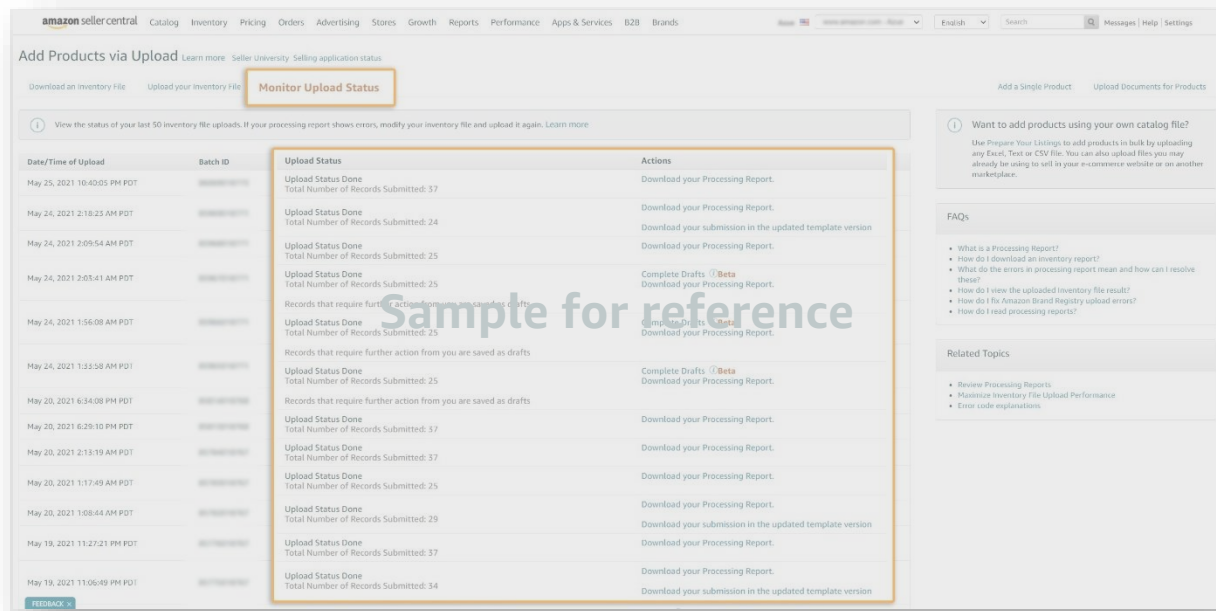

Step 3: You can check whether there are any errors on your file on “Monitor Upload Status”. If there are errors you can correct them and then upload and check the file.

Step 4: After you have ensured your file is error-free, select the type of file under “Upload file” on the “Add Products via Upload” page. Click “Choose File” to upload;

Step 5: As in the case with “Check My File”, you will still need to check your file processing report on “Monitor Upload Status”. You can check whether there are contents in your inventory file that need to be revised;

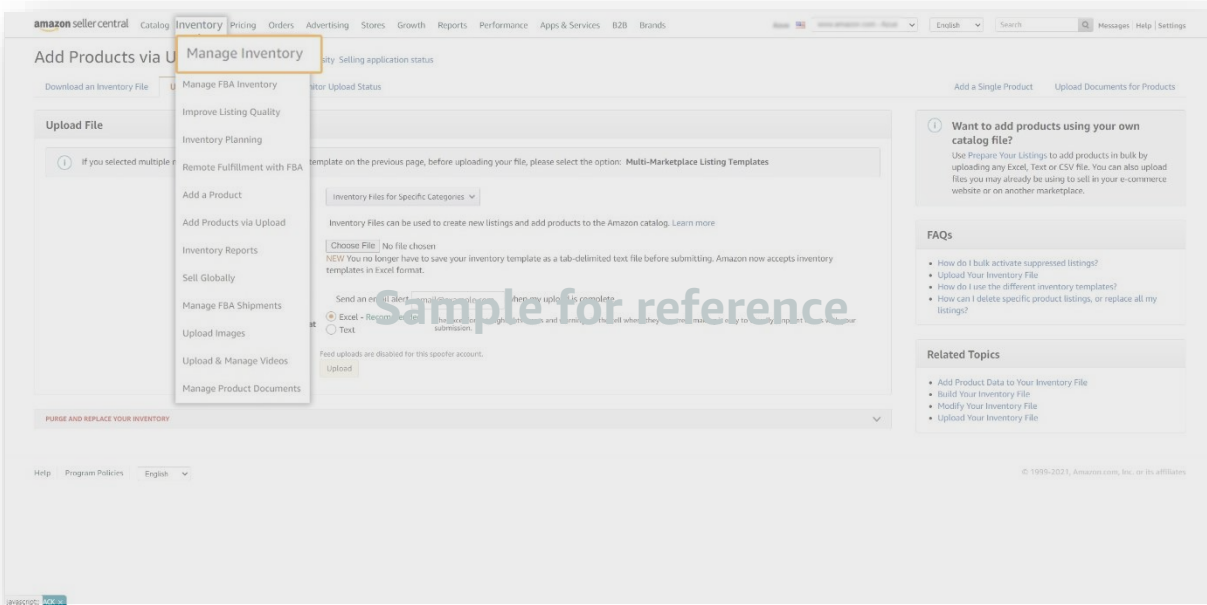

Step 6: You would have completed the products’ inventory plan once the processing report shows no error.

4.5 Convert listings to Fulfilled by Amazon

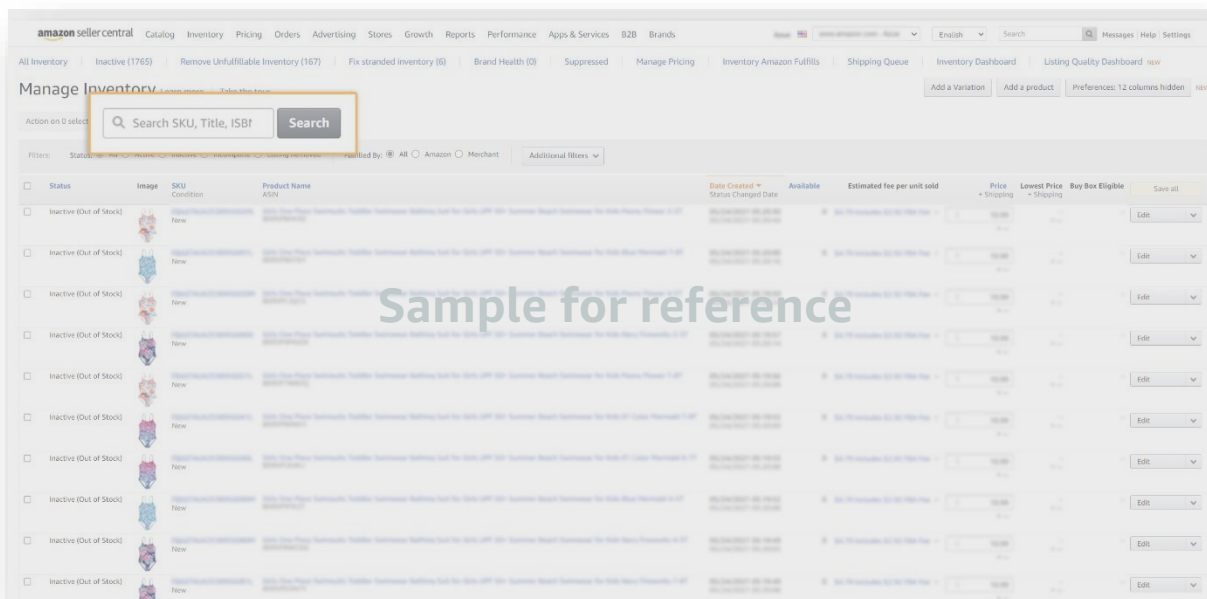

After your listing is shipped to Amazon, you can convert it into FBA inventory using the following steps, so as to allow you to continue carrying out relevant shipment operation on Seller Central.

Firstly, click “Manage Inventory” on “Inventory” tab in the menu to access inventory management interface;

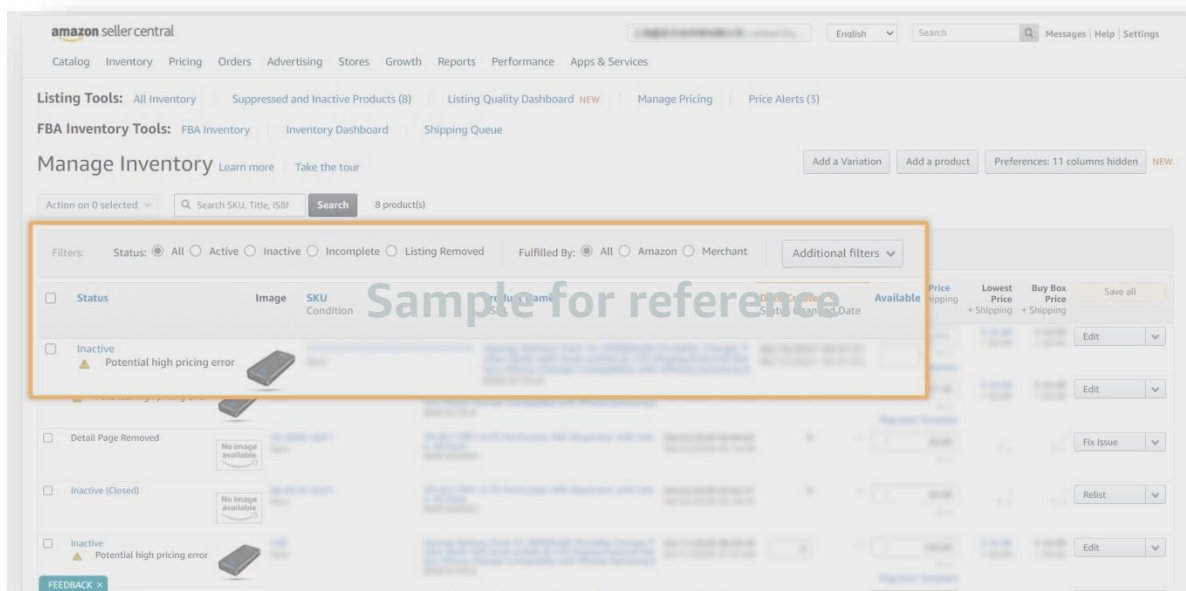

After you have accessed inventory management page, look for the products that you wish to convert to FBA listing. You can conduct search using any of the following means:

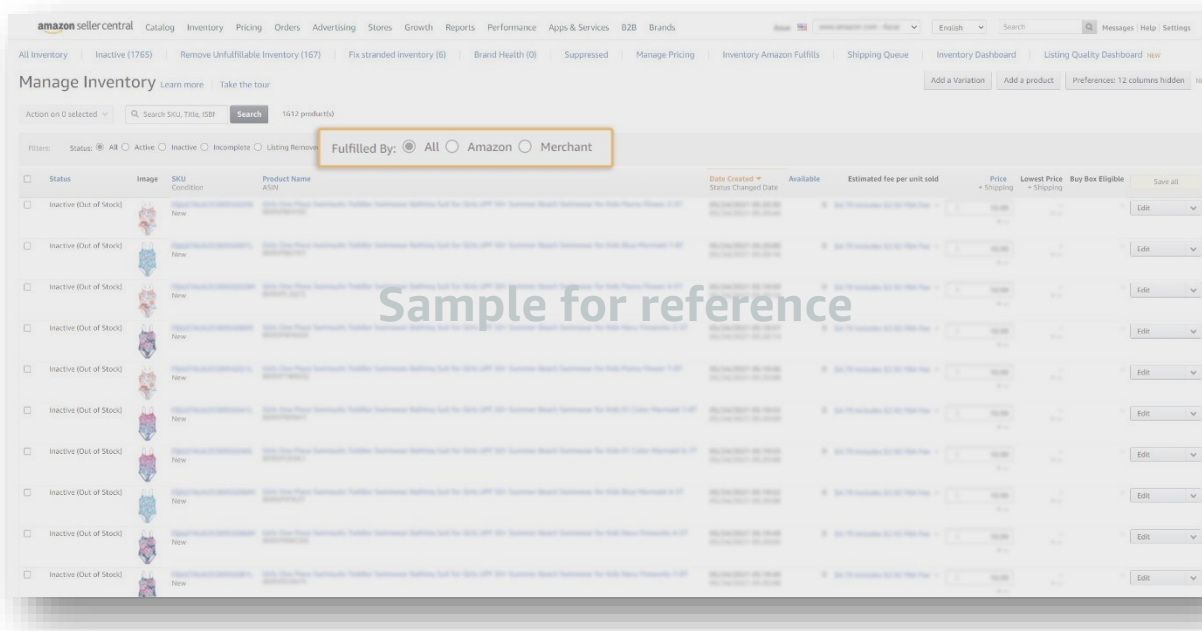

Method 1: Search product SKU, Title or ISBN;

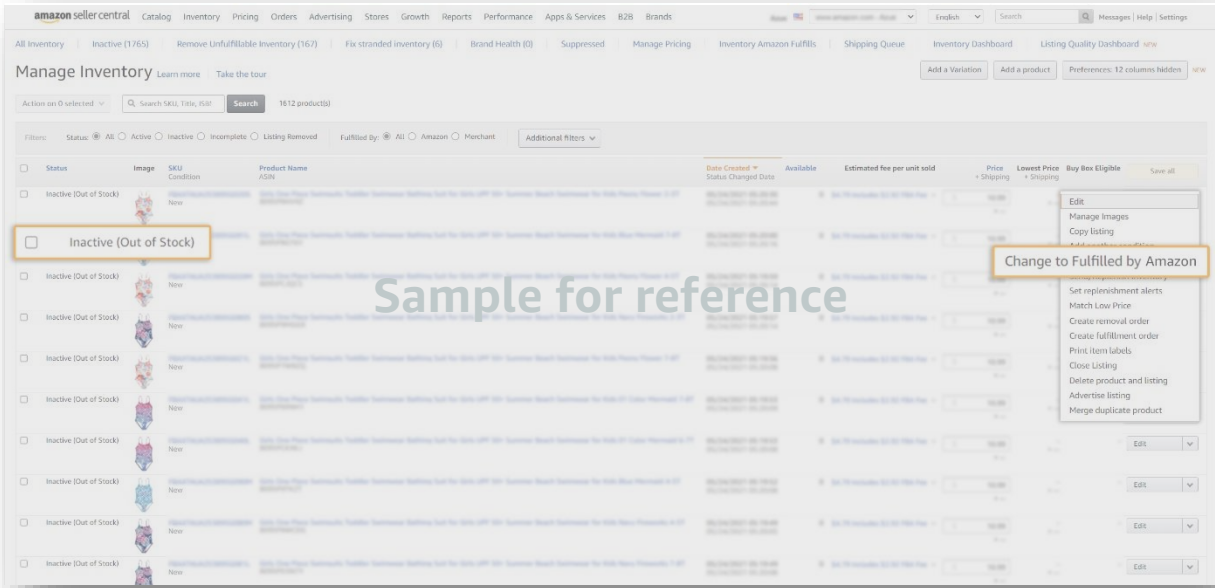

Method 2: You can screen those products that you wish converted to FBA listing through their shipping attributes, using “Status” and “Fulfilled By” as the main conditions. Of course you can also screen the products using other conditions (such as beginning and ending dates for search, or prices above or below certain prices);

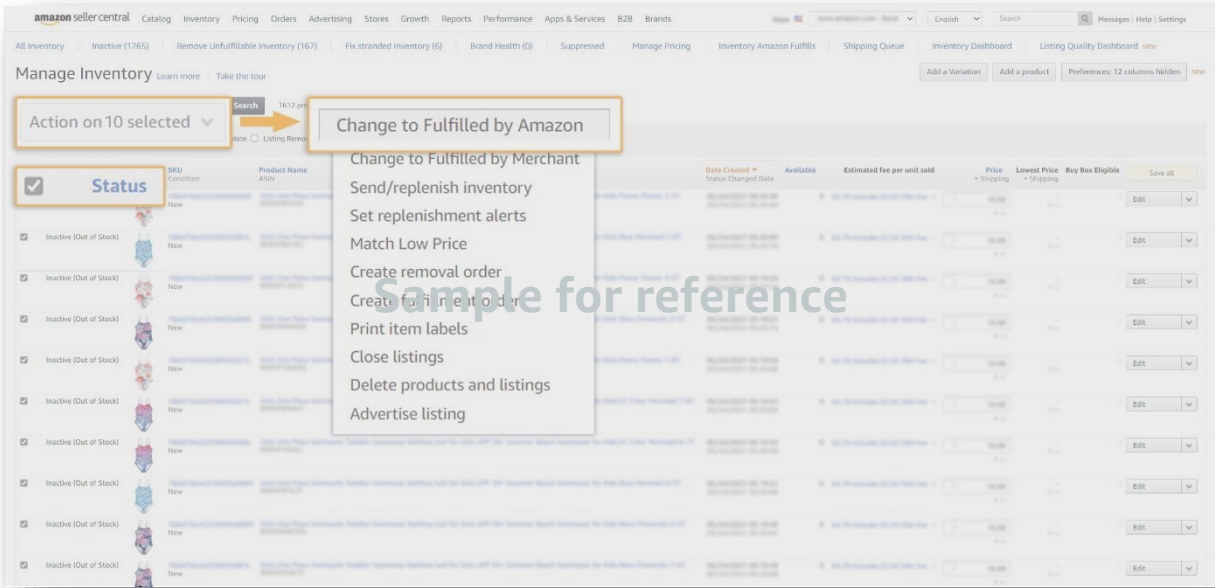

Please remember to select “All” under “Fulfilled By” when carrying out searches.

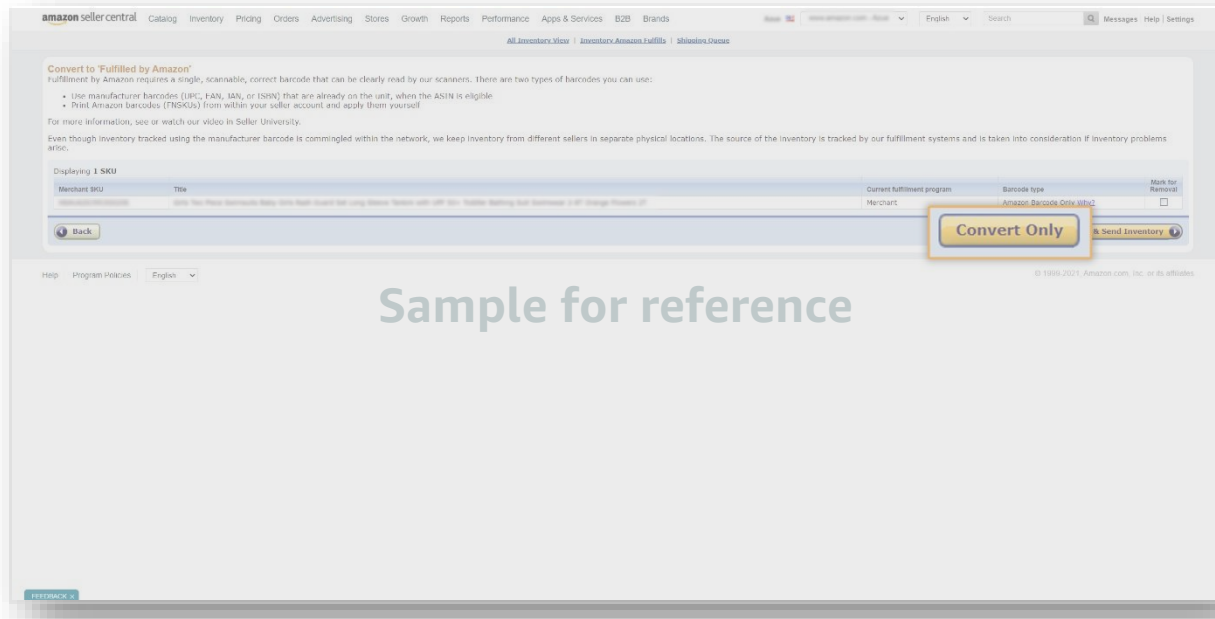

After you have found the product using any of the above means, tick “✓” in the box to its left. Then click “Change to Fulfilled by Amazon” in the “Edit” box on the far right.

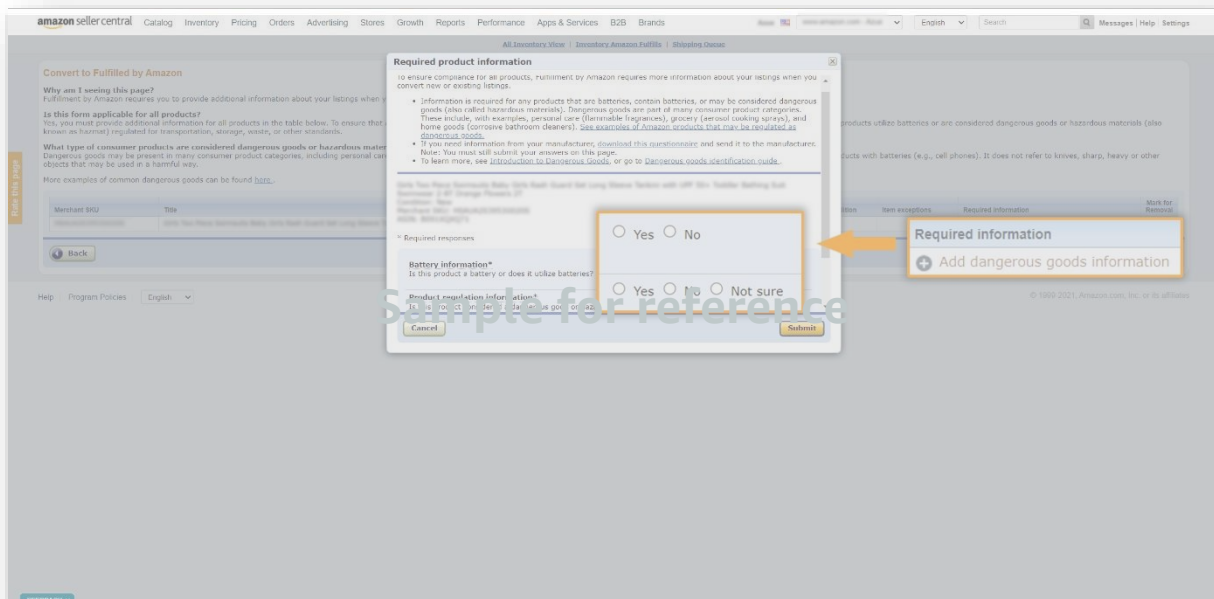

If you wish to convert all the listings to FBA, select all under “Status” with “✓”. Then select “Change to Fulfilled by Amazon” in “Action on 10 selected” in the pull-down menu;

Once you have clicked “convert to FBA”, you will be directed to the following page, click “Convert Only” to confirm conversion to FBA;

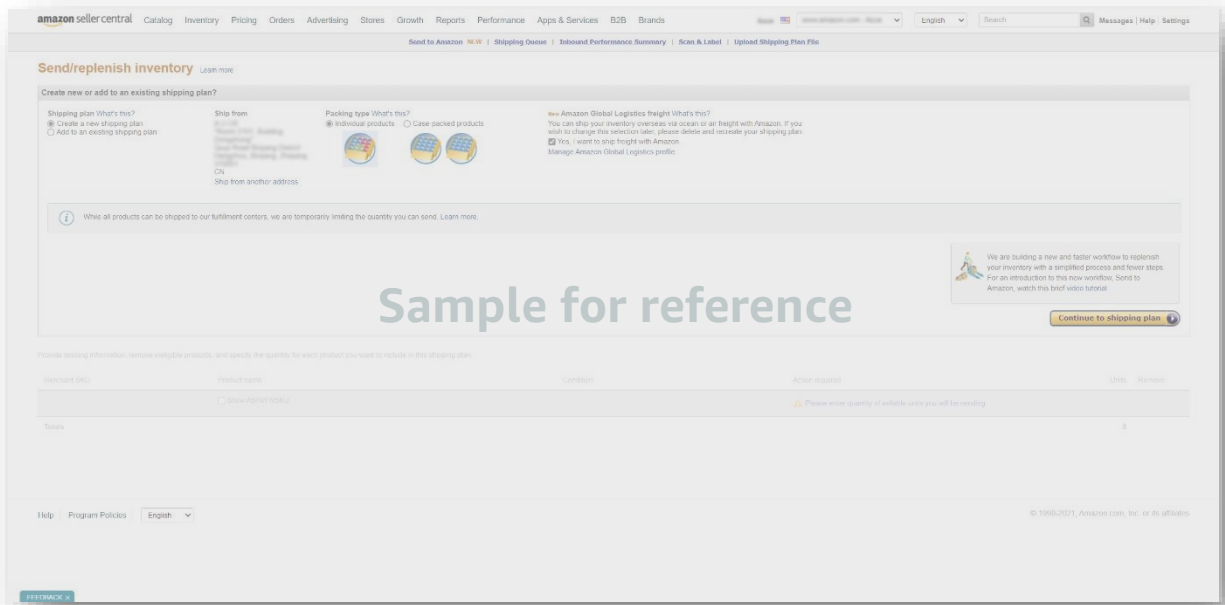

You will then be redirected to “Add information on dangerous goods”. You will need to confirm in the pop-up window whether the listings contain batteries or whether they are dangerous items/substances. If you are unsure whether your listings are dangerous goods, [click here](#) to check and confirm. After you have completed the above click “submit” to return to the earlier page. Select “save and continue”;

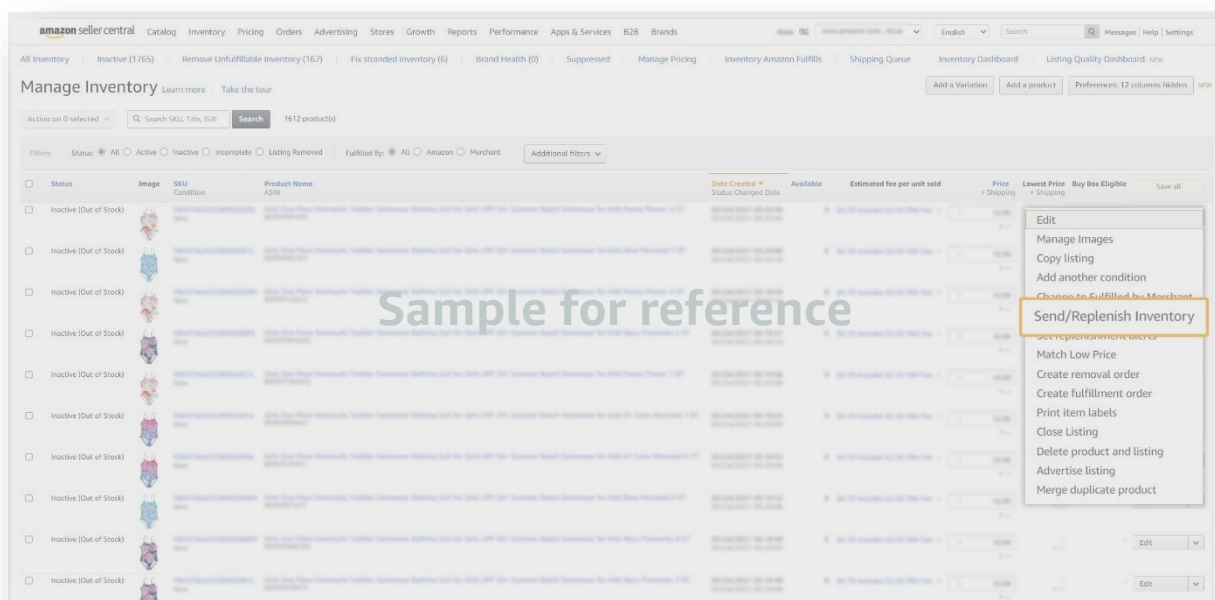

By clicking “Save and Continue” you would have confirmed conversion of your listing to FBA. You can then ship/replenish listing in the page to which you are directed. You can also carry out shipment/replenishment of relevant listings in the “Manage Inventory” page.

4.6 Shipment to Amazon/replenishment

After you have converted your listing to FBA according to the instructions in the previous section, you will be redirected to "Send/replenish inventory" page. You can ship/replenish stock to add to your inventory in fulfillment centers by following the instructions;

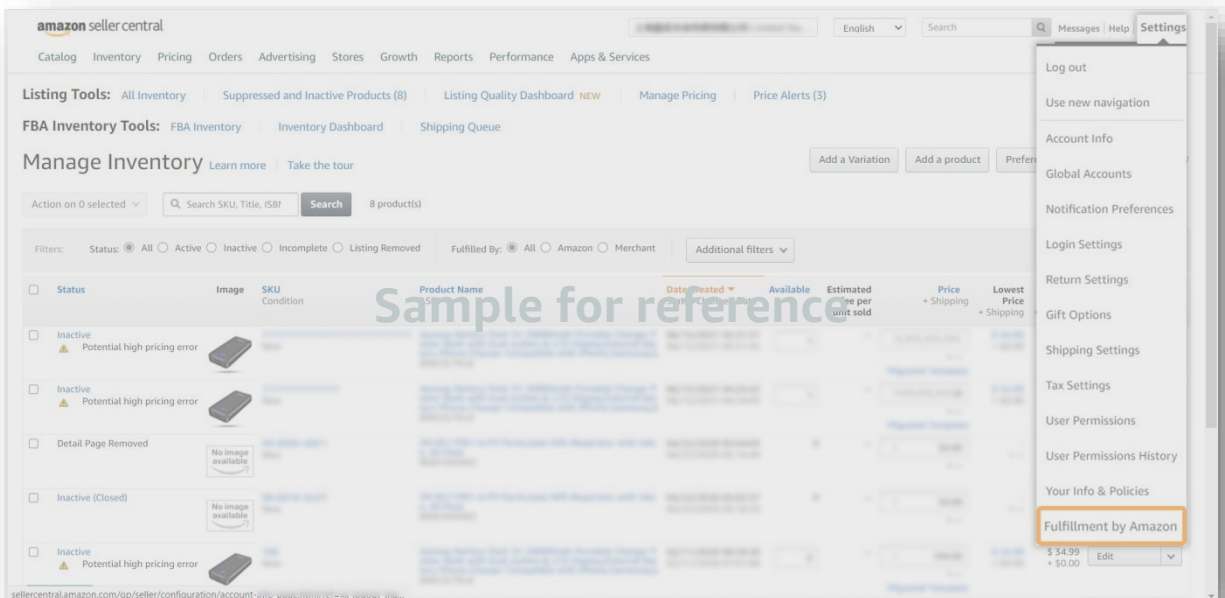

You can also choose to defer shipment/replenishment. Click "Inventory > Manage Inventory" in the menu and select the editing column to the right of the listing concerned, then click "Send/Replenishment inventory". You will also be redirected to "Send/replenishment inventory" page

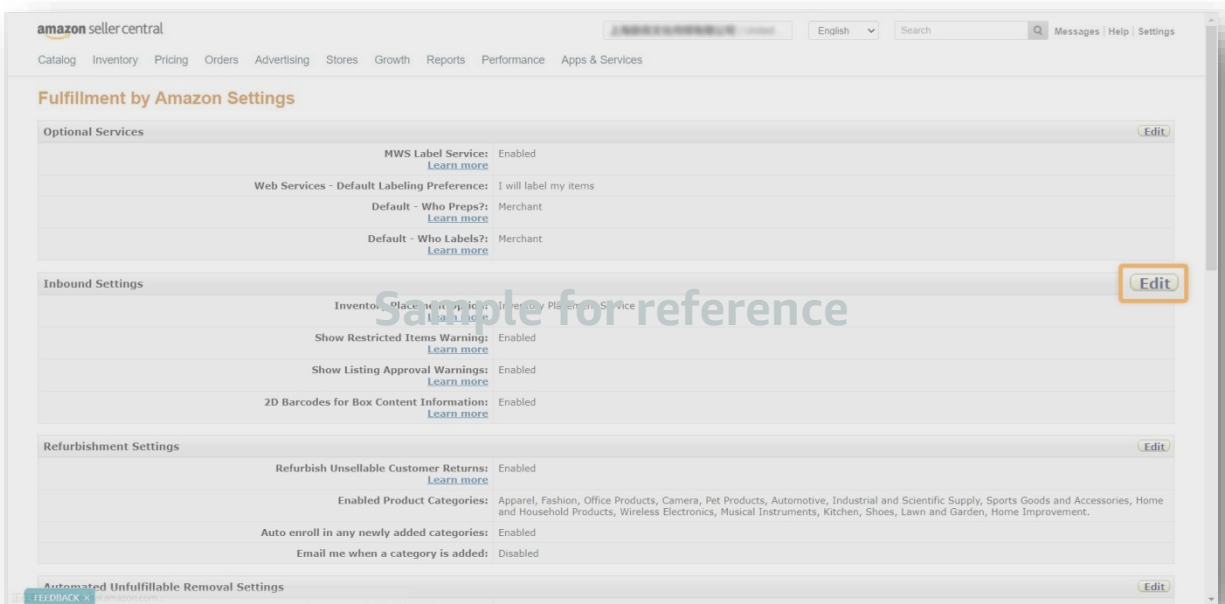

Before shipping to Amazon/replenishing your stock, you will need to consider whether **to ship the stock to one or several fulfillment centers**. Please note that if you do not set shipment to a fulfillment center (that is “combined inventory”), then depending on the nature of the products and other factors we may breakdown the inventory into different units and ship them to several fulfillment centers (that is “distributed inventory”). Alternatively we may ship the entire inventory to a fulfillment center. In any case this is automatically carried out Amazon system.

If you do not wish to have your inventory distributed, you would need to set combined inventory in advance on Seller Central. Note that this service is charged on a per-item basis. Please refer to the following for combined inventory setting:

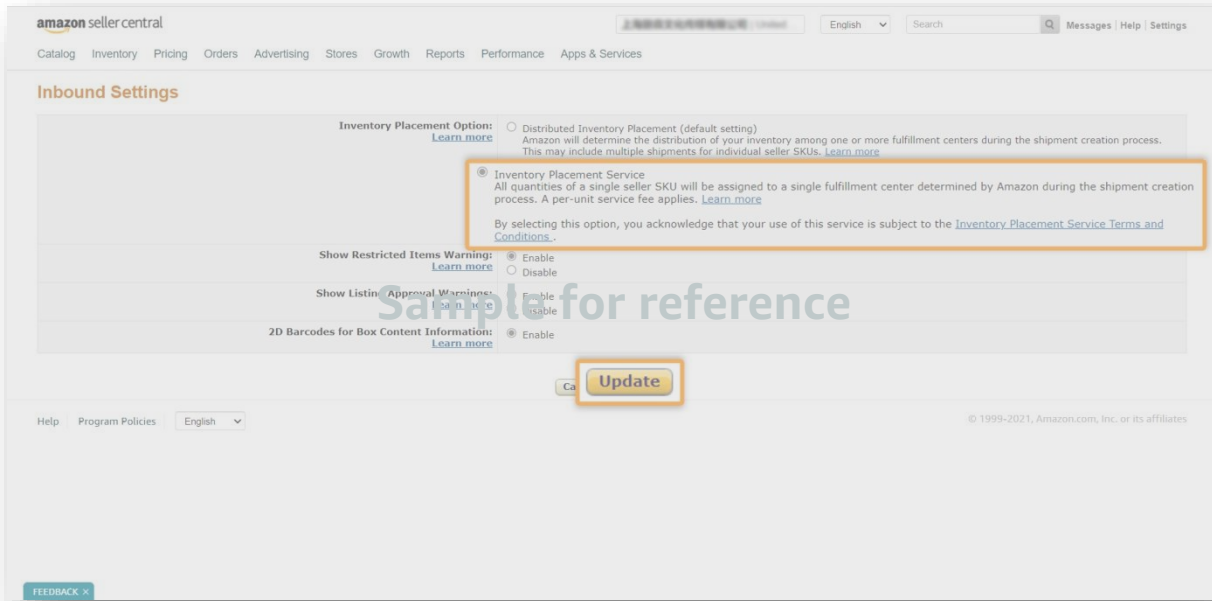

Step 1: Select “Settings > FBA” on Seller Central;

Step 2: Under “Inbound Settings” on FBA Settings page, click “Edit”;

Step 3: Under “Inventory Placement Option” on Inbound Settings, select “Inventory Placement Service” and click “Update”;

Clicking “Update” means you have completed combined setting. Next we will proceed to shipment/replenishment operation.

You need to confirm the shipping address and packaging type are correct in the "Send/replenish inventory" page.

- As for packaging type, please select “Individual products” or “Case-packed products” according to your situation. Individual products: There are several SKUs in a carton. Case-packed products: There is only one SKU in a carton.

- By default Amazon will use A4-size paper for printing. You can also buy adhesive paper in A4 format¹ for printing. An A4-size paper typically produces 21~44 labels. You can select the appropriate label size according to the dimensions of packaging. After you have made the selection, click “Print labels for this page”;

- Below is a screen shot of SKU label. To ensure fuss-free receipt into inventory, you need to fix the label on the item or packaging. Please remember not to fix the label on the wrong SKU;

1. Adhesive paper: It is mainly made using white-board paper with high tensile strength coated with adhesive. It is mostly used to print labels.

- After double-checking, click “Continue” to proceed to the next step.

After you have completed the information as above, you will be directed to the page below. Click “Work on Shipment” to prepare the items.

Step 2: Select suitable front-leg logistics and fulfillment service;

- Fulfillment means: The default choice is “small parcel delivery (SPD)”
- Carrier: The default choice is “United States Postal Service”

This screenshot shows the 'Review and modify units' page in Amazon Seller Central. The 'Shipping method' section is highlighted with an orange box. It contains two radio button options: 'Small parcel delivery (SPD) I'm shipping individual boxes' (which is selected) and 'Less than truckload (LTL) I'm shipping pallets; shipment at least 150 lb. Which method should I choose?'. To the right, the 'Shipping carrier' section is also highlighted with an orange box. It shows 'Amazon-Partnered Carrier (UPS)' as an option that is currently not available, and 'Other carrier:' as the selected option. Below this, there are dropdown menus for 'Shipping mode' (set to 'Please select') and 'Carrier' (set to 'United States Postal Service'). A large, semi-transparent watermark 'Sample for reference' is overlaid on the center of the image.

Step 3: Package the items. Please select “Everything in one box” or “Several boxes” according to your situation. If you select “Everything in one box”, you will need to enter the carton’s Size and weight. See Course: 2.3 Packaging inbound FBA items for more information on packaging requirements. [Click here](#) to see learning resources guide.

This screenshot shows the '3. Shipment packing' page in Amazon Seller Central. The 'Box content information' section is highlighted with an orange box. It contains a dropdown menu for 'How will this shipment be packed?' with 'Everything in one box' selected. Below this, the 'Shipment contents' table is visible, showing a single item: 'FBAXTAUA2S38950020S Girls One Piece Swimsuits Toddler Swimwear Bathing Suit for Girls UPF 50+ Summer Beach Swimwear for Kids Peony Flower 2-3T Size: Standard-Size UPC: --'. The 'Shipment quantity' is 90. To the right, the 'Box weight (lb.)' and 'Box dimensions (in.)' fields are highlighted with an orange box. A large, semi-transparent watermark 'Sample for reference' is overlaid on the center of the image.

If you select “several boxes” you will need to provide correct information on the items in the boxes. You can click any of the means provided on the page to provide information on the items.

- Use the form on the web page (recommended) and enter details on the boxes.
- Uploading file: Complete packing list and upload to Seller Central.
- Skip information on box and collect manual processing fees: Amazon will manually handle the items in the boxes. We will calculate the total processing fees based on the total number of items in the boxes multiplied by processing fee for each item.

3. Shipment packing

New tools for providing box information
By providing us with the contents of your boxes, we are able to receive your shipments more efficiently and improve your inventory accuracy. Providing this information is optional but highly recommended. [Learn more](#)

How will this shipment be packed?
More than one SKU per box (10 boxes or less)

How will you provide box content information? [Learn more](#)

Use web form (recommended)
Enter box information into a form on webpage

Upload file
Fill out a pack list and upload to Seller Central

Skip providing box contents
Select if you are using 2D barcodes or if you are unable to provide box information.

How many boxes are in the shipment?
☐

Let us know what you think

Step 4: Print item label. After completing the packaging, use heat-sensitive paper¹ to print labels and affix them on the boxes.

Let us know what you think

4. Shipping labels

Select a paper type that is compatible with your printer format. Since each box label is unique, be sure to print all box labels. Do not photocopy, reuse, or modify labels for use on additional boxes. A box ID label is required even if the box contains a single sellable unit. Boxes containing multiple standard-size items must not exceed 25.00 inches on any side. [Learn more](#)

Want your shipments received faster?
Ensure that you provide the correct tracking IDs from your carrier. This can help Amazon receive your shipment up to 30% faster and make your products available for sale sooner.

Ship date
Ship date is the date you expect to hand your inventory to the carrier. This date helps us prepare to receive your inventory. This date can be changed after you have confirmed shipping.

1. Heat-sensitive paper: It is a type of processed paper. A layer of “heat-sensitive” adhesive (heat-sensitive color-changing layer) is coated on quality raw paper. It is typically used to produce labels.

4.6.7 Tracking items

You will be directed to “Track shipment” page after you have completed the above steps. Here you should enter the waybill number for the items provided by the carrier. Click “Save All” to track the items’ logistics information.

Shipment events **NEW** | Track shipment | Shipment contents | Reconcile

☒ Add individual tracking IDs ☐ Upload tracking IDs in bulk

For faster receive times, ensure that your carrier tracking IDs map to the Amazon FBA box label on each box

Box: 1

Carrier status:

Weight (lb.): 90

Dimensions (in): 10 x 10 x 10

Prefer to scan your tracking IDs? You can now quickly scan carrier tracking IDs using a connected hand scanner. [Learn more](#)

Save All

[Back](#) [Delete shipment](#) [Return to Shipping Queue](#) [Duplicate](#) [Work on another shipment](#)

You can also elect to enter the waybill number later. Click “Inventory > Management FBA inventory > Shipping Queue” on the menu. On the edit column to the right of the item concerned, click “Track shipment” to enter the waybill number.

4.7 FBA Seller Operation, Management and Analysis

Daily analysis and management are key aspects of your operations after you have successfully sold products on Amazon. You can improve your rate of return on inventory by appropriate management of inventory. You can also improve user experience through managing buyers' information, as well as check and improve shortcomings in your operations using FBA data reports. Let us next see how we can use these tools.

4.7.1 Management of Inventory Health

By using the tools in your Seller account, you can manage excess inventory easily and let products with less attention obtain greater opportunity for exposure. You can also reduce storage fees and improve storage efficiency by using inventory removal.

- Manage excess inventory

Amazon helps you to easily confirm excess inventory that may exist, and provides you with suggested measures for better managing the return on investment for your inventory. Depending on the nature of your business and products, the following are some suggested operations in the pull-down menu to the right of the products in inventory management.

Edit product information

If there are potential quality problems for your products
Click on the pull-down menu to be directed to product catalog
Find the reminder in the catalog to address the problem

Products promoted

This will activate Amazon product promotion work process
Advertisement is an effective mean
To bring more traffic to your products

Discount promotion

Depending on the flexibility of your product price and your investments in the products
We will provide recommended sales price
And duration for price adjustment

Create removal order

We provide recommendations for removal orders based on your needs
This does not mean suggestion of removal of the entire inventory
You only need to restore your inventory to a healthy level

- Create removal order

You can create removal orders in two ways:

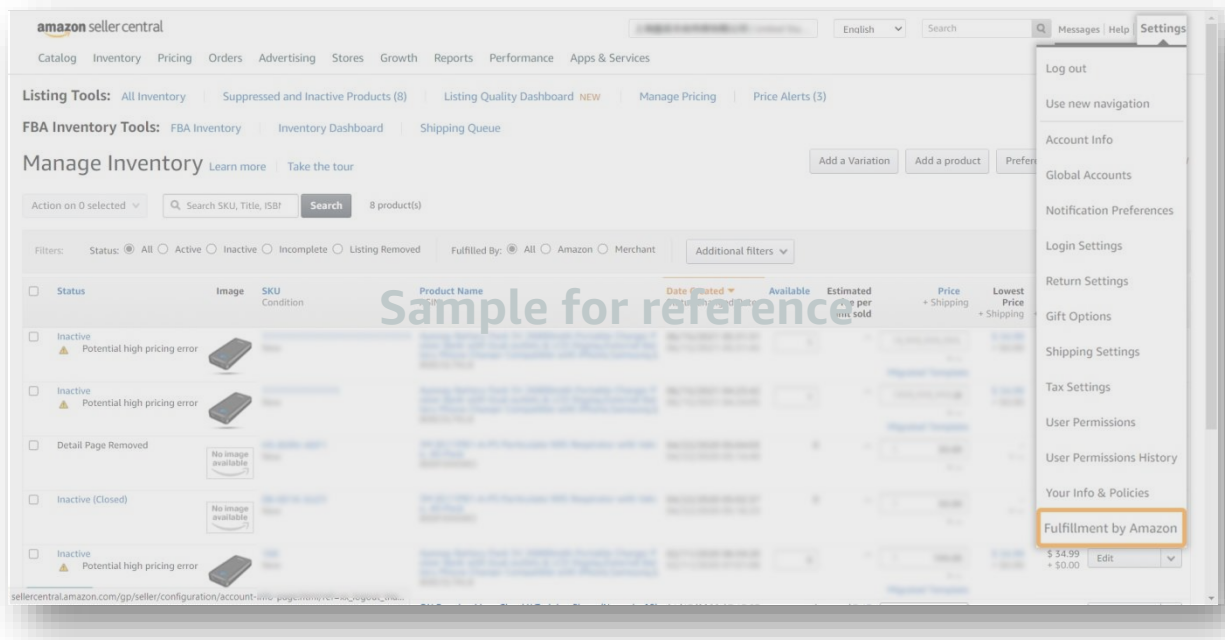

Method 1: Click “Inventory > Management inventory > Create removal order” and select the inventory to be removed. If you wish for the products to be returned to you, please provide the receiving address and complete the following information; if you wish to discard them, please select “Disposal”;

Method 2: Click “Data report > Inventory and sales report > Recommend removals”. Under recommended removal report, click “Begin Removal Process”; if “Begin Removal Process” is not show, it means you do not have any inventory recommended for removal.

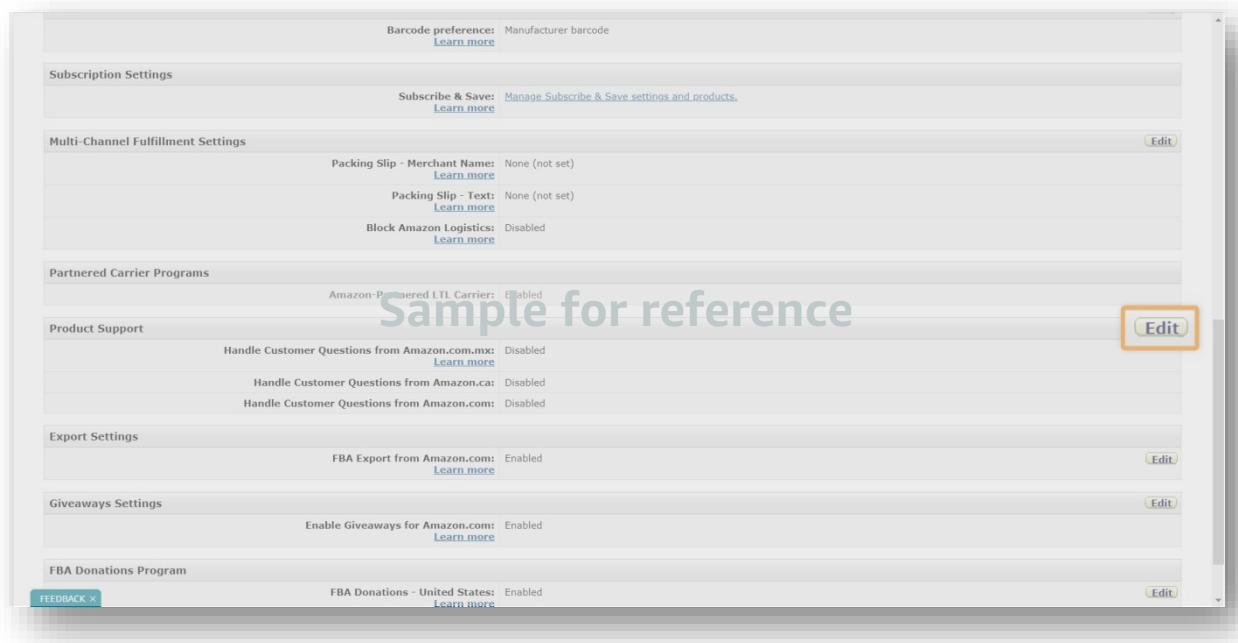

4.7.2 Replying and processing buyer reviews

FBA provides 7x24 hour customer service. You can also reply to buyers' questions on specific product through "buyer-seller messages", thereby giving buyers better shopping experience.

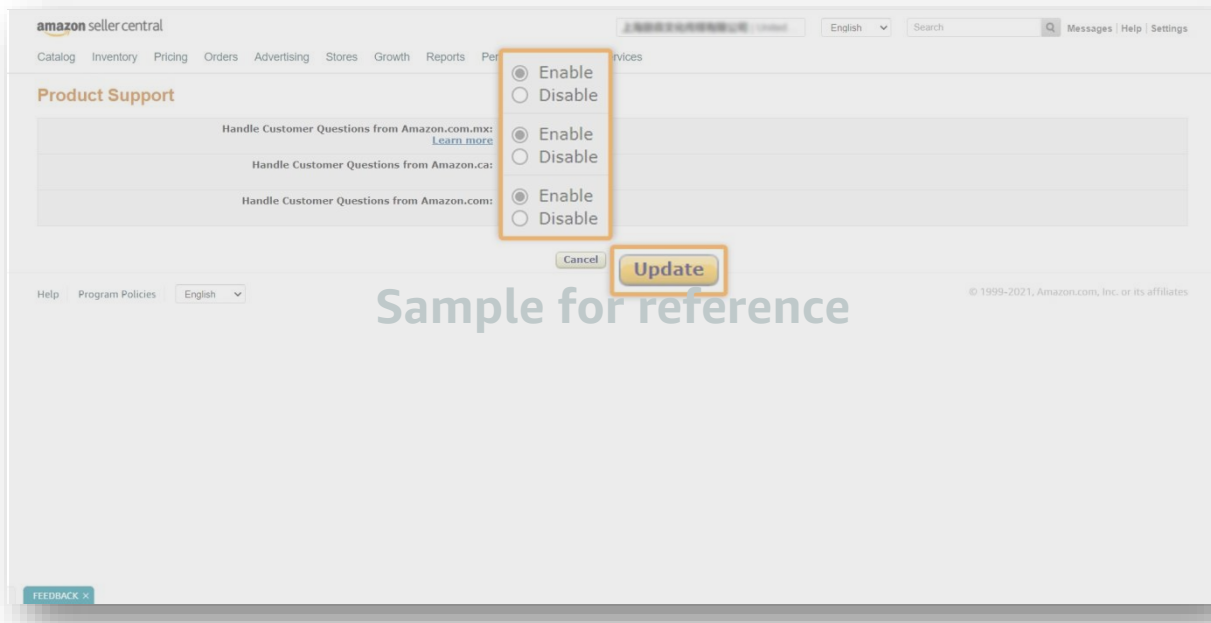

- First of all, click "Setting > FBA" on Seller Central;

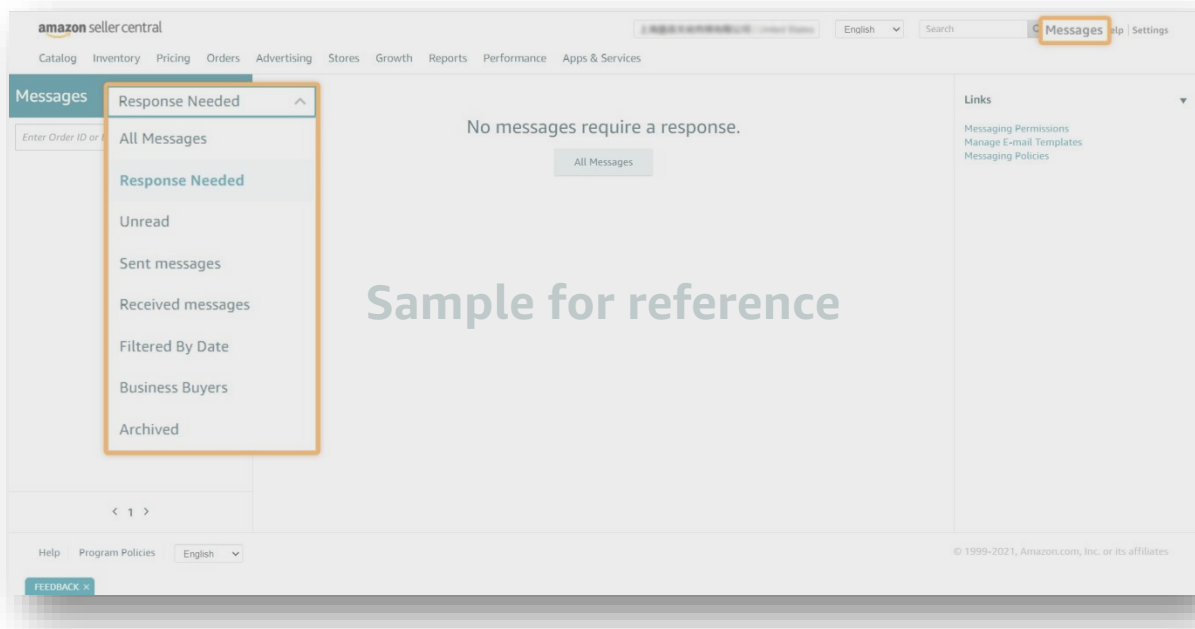

- Then click "Product Support > Edit" Respectively;

- Select “Enable”, then click “Update”;

If after following the above instructions you still have not found messages that you wish to reply, click “Buyer Messages” to enter message-reply page. Select “Response Needed” for the pull-down list, then click the relevant message for your reply.

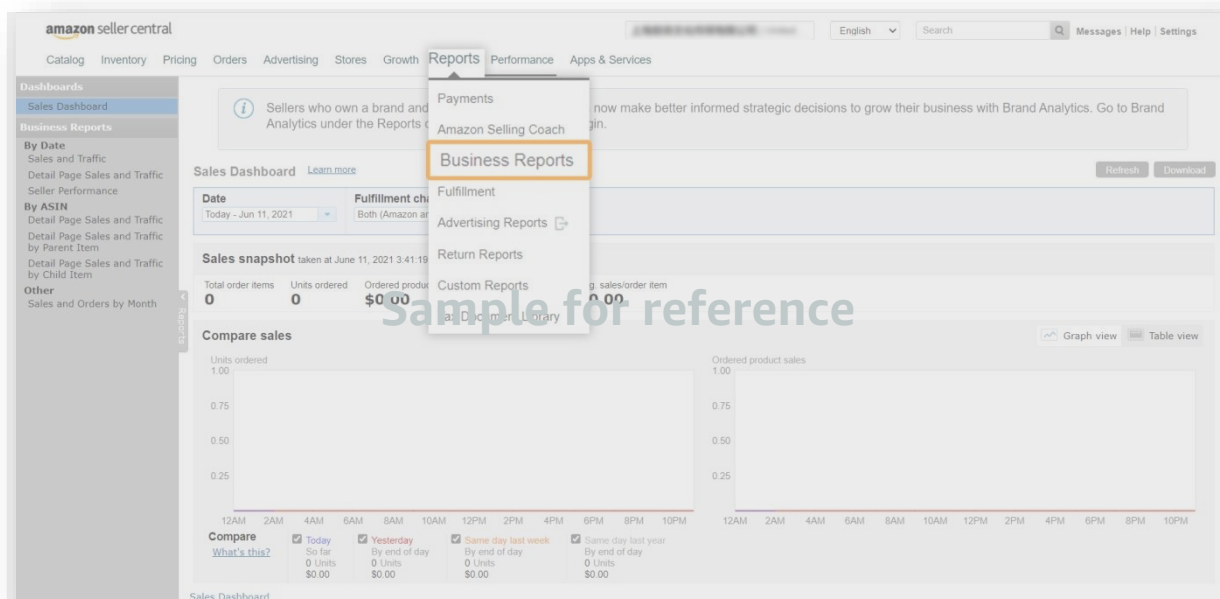

4.7.3 Checking and downloading FBA data report

You can all sorts of reports on FBA on Seller Central. Examples include sales report, inventory report, buyer return or replacement report and FBA report. You can adjust your business operation by analyzing such reports.

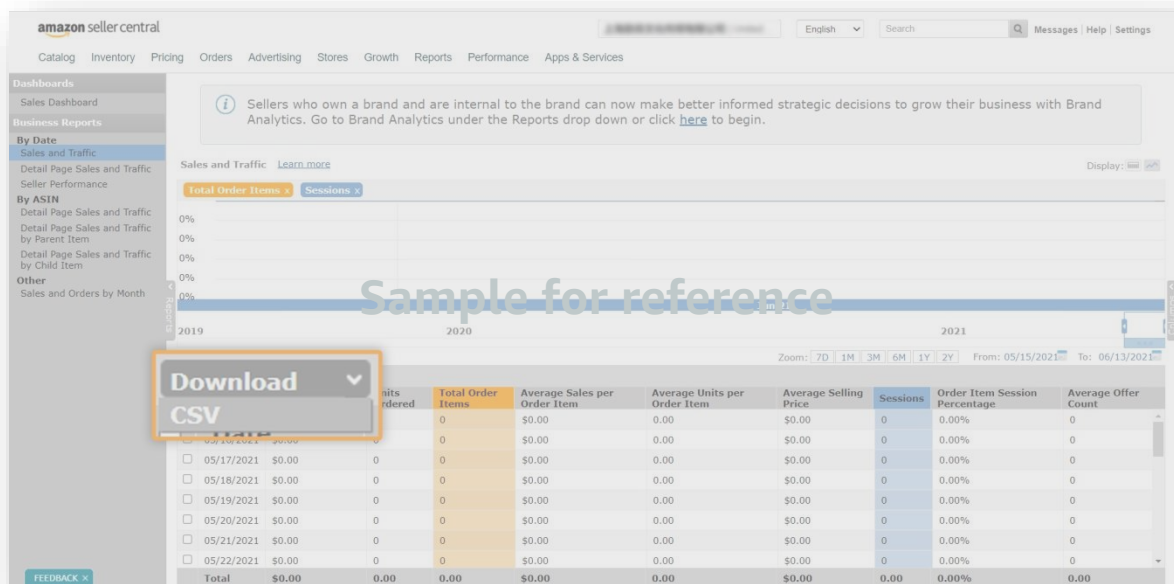

- **Check your business report (based on data, ASIN and others)**

Click “Report > Business reports” on the menu to view your business report. In the navigation column on the left of the page there is a series of reports organized according to [date], [ASIN] and [others]. You can click on the option to view the data.

- **Downloading business report**

Select the checkbox on the left and click “Download” to download data report in CSV format.

4.8 Terminologies and Definitions

Terminology	Definition
Adhesive paper	It is mainly made using white-board paper with high tensile strength coated with adhesive. It is mostly used to print labels.
Heat-sensitive printing paper	It is a type of processed paper. A layer of “heat-sensitive” adhesive (heat-sensitive color-changing layer) is coated on quality raw paper. It is typically used to produce labels.

Learning Feedback

If you found the content covered to be helpful for you, please light up the "✓" in the bottom right corner of the page to give your feedback, thank you!

The screenshot shows the Amazon Seller University interface. The top navigation bar includes links for Catalog, Inventory, Orders, Advertising, Stores, Growth, Reports, Performance, and Apps & Services. The main header features the 'amazon seller central' logo, a search bar, and a 'New to selling on Amazon? Start here' link. The breadcrumb trail indicates the user is in 'Topic: Essential Courses for Global Seller' > 'FBA Basics 1.4 - Guide to Using Fulfillment By Amazon (FBA) - Global Seller'. The left sidebar, titled 'Browse topics', lists various categories, with 'Essential Courses for Global Seller' highlighted. The main content area displays the 'Fulfillment by Amazon (FBA) Handbook Chapter 4' with a large orange header. Below the header, there are language options (English, 中文, 日本語, Tiếng Việt, 한국어) and a 'Learn about FBA solution offers >' button. A 'Module' section describes the content: 'FBA Basics 1.4 - Guide to Using Fulfillment By Amazon (FBA) - Global Seller' and lists learning objectives. On the right, a 'More Info' section lists related topics. Two callout boxes are overlaid on the page: one on the left sidebar highlighting 'Essential Courses for Global Seller', and another on the bottom right showing a 'Was this useful?' feedback prompt with a green checkmark selected.
