About the Strategic Gears' Saudi Arabia Ramadan Consumer Behaviour Report

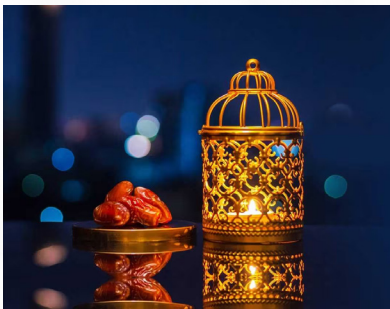

Scope

The Strategic Gears' Annual Saudi Arabia 2023 Ramadan Consumer Behaviour publication presents insights on how consumers in Saudi Arabia behave during Ramadan, versus the rest of the year, and compares behaviours in Ramadan 2023 versus 2022. The report concludes with our expert recommendations for how businesses and marketers may engage consumers during Ramadan season.

The areas explored in our report are:

General Behaviours During Ramadan

General behaviours during Ramadan versus the rest of the year and versus 2022; particularly behaviours related to:

- Time spent with family/friends.
- Travel behaviours.
- Sleeping behaviours.
- Charity work.

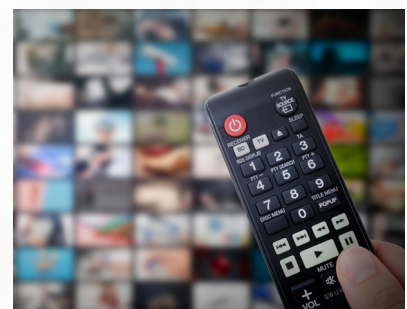

Consumer Spending Behaviours During Ramadan

Consumer spending behaviours during Ramadan versus the rest of the year and versus 2022; particularly behaviours related to:

- Online and in-person shopping behaviours.
- Products purchased.
- Times when purchasing happen.
- Factors influencing purchases.
- Eating out and ordering food.
- Income shares allocated to spending activities.

Media Consumption Behaviours During Ramadan

Media consumption behaviours during Ramadan versus the rest of the year; particularly behaviours related to:

- TV consumption behaviours.
- Video-on-demand (VOD) consumption behaviours.
- Social media consumption.
- Other media.

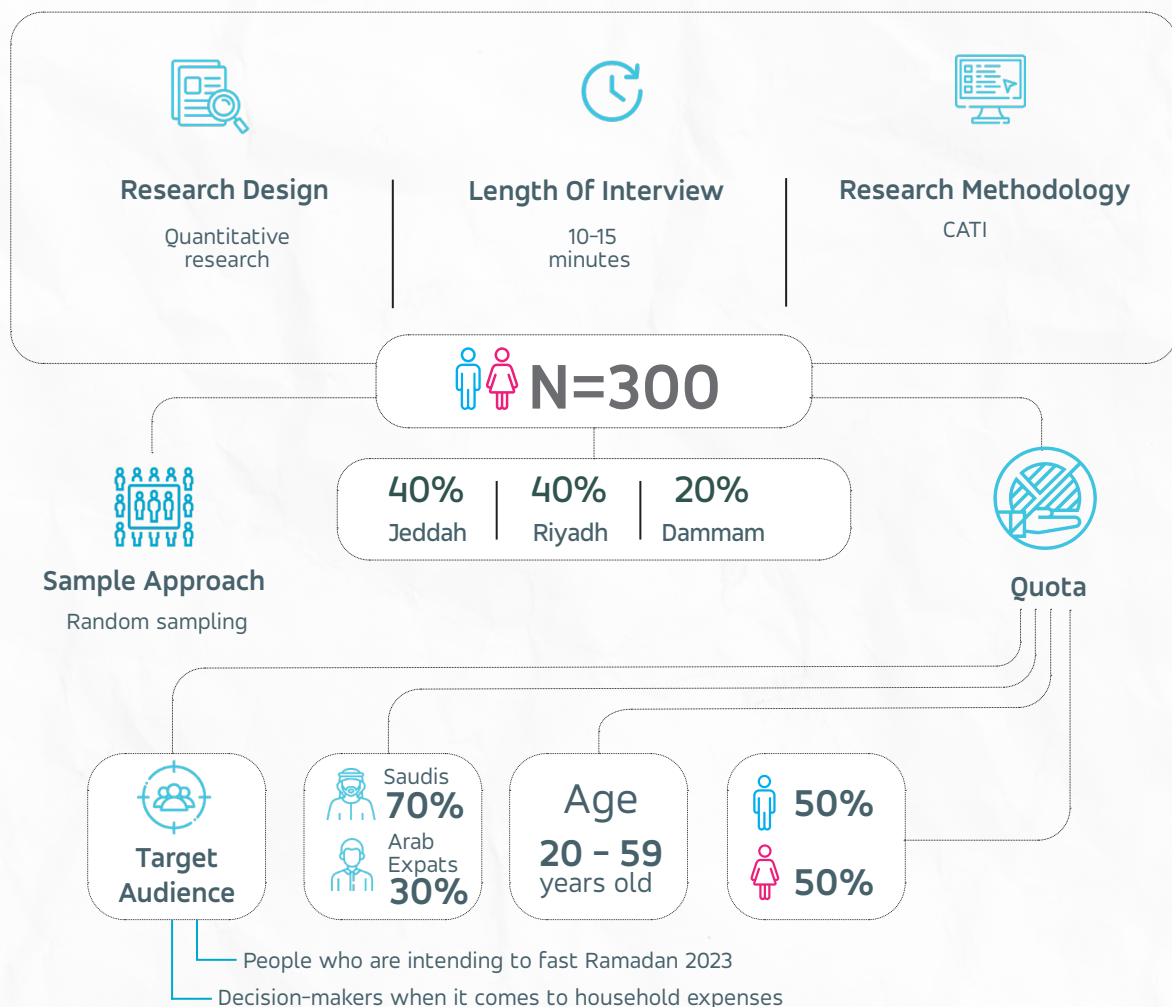

About the Strategic Gears' Saudi Arabia Ramadan Consumer Behaviour Report

Methodology

The findings of this report are the result of both a quantitative survey and secondary research conducted by Strategic Gears' in-house experts of macroeconomic and marketing research personnel to provide a deeper understanding and insight into Ramadan behaviours in the Kingdom.

Details of the quantitative approach and profile of respondents are below:

This Ramadan study conducted this year is one that Strategic Gears plans to conduct annually going forward to monitor any changes in behaviour patterns in Saudi Arabia over the upcoming years.

Key Insights Summary

What Behaviours are Like during Ramadan

General Behaviours During Ramadan

Aside from praying & reading the Quran and sleeping, the top 3 things respondents tend to do during Ramadan are spending time with family & friends, preparing food and visiting the mall. Time spent with family & friends usually takes place during Iftar. Most respondents said they also get the same amount of sleep during Ramadan and year-round (7.1 hours on average).

Compared to other months in the year, respondents tend to prioritise participation in charity & religious competitions. Giving to charity is a fundamental aspect of Ramadan. Most donate money through EHSAN (national platform for charitable work) and to cases directly.

Consumer Spending Behaviours During Ramadan

Clothing is the most common product purchased online while groceries are the most commonly bought in person by respondents during Ramadan. By gender, the product categories purchased the most, both online and in person, among respondents are similar but the order of preference differs slightly between males and females. These products include groceries, clothing, health & beauty products, kitchenware and home furniture.

The top factor for males when making a decision to buy a product during Ramadan is promotional offers while for females the priority is quality. The bulk of purchasing for Ramadan happens within the two weeks prior. This is in line with SAMA's weekly point-of-sale transaction data.

Media Consumption Behaviours During Ramadan

During Ramadan, people mostly watch TV (more than other months of the year), use social media, surf the internet, and watch videos on-demand. Of those watching tv, there is a preference for Arabic series, particularly Egyptian. In terms of VOD platforms, Shahid is the most popular followed by Netflix. The peak TV viewing window is 6pm to 9pm while VOD viewing peaks from 9pm to midnight.

Snapchat is the most popular social media platform used during Ramadan, followed by YouTube, Instagram, TikTok, Twitter and Facebook. Other media consumed during Ramadan include listening to the radio, browsing the internet, and listening to music.

Introduction Overview

For the Muslim community globally, Ramadan is one of the most important times of the year. It is a time for introspection, prayer, and fasting throughout the day. The Islamic calendar, which consists of 12 lunar months with a combined length of 354 or 355 days, determines when Ramadan officially begins each year. As a result, the fasting month advances by up to 10 days on the Gregorian calendar every year. It runs from March 23 to April 21 this year. Dates may change, though, depending on the appearance of the new crescent moon, which heralds the beginning of the month of Shawwal, or after the 30th day of Ramadan.

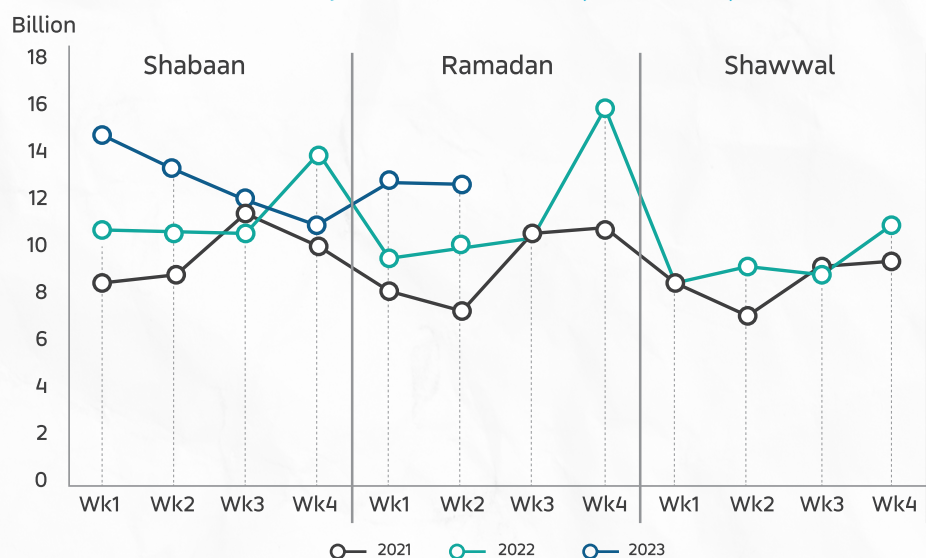

The holy month is observed in Saudi Arabia through various customs and traditions as well as shortened official business hours for both the public and private sectors, adjusted store hours and extended hours for most restaurants and cafes (also making up for hours closed during the day).

For consumers, Ramadan offers significant sales, discounts, promotions and other exclusive offers on a variety of goods and services both in traditional and online stores. Ramadan also presents opportunities for some businesses to grow their clientele and revenue.

While Ramadan is generally a slow month for stock market trading in Saudi Arabia (& around the MENA region), pre-Ramadan, during Ramadan, and post-Ramadan periods are characterized by some volatility in consumer spending in Saudi Arabia.

Strategic Gears' analysis of weekly point-of-sale transactions data from the Saudi Central Bank, SAMA, reveals that:

Weekly POS Transactions (SAR Billion)

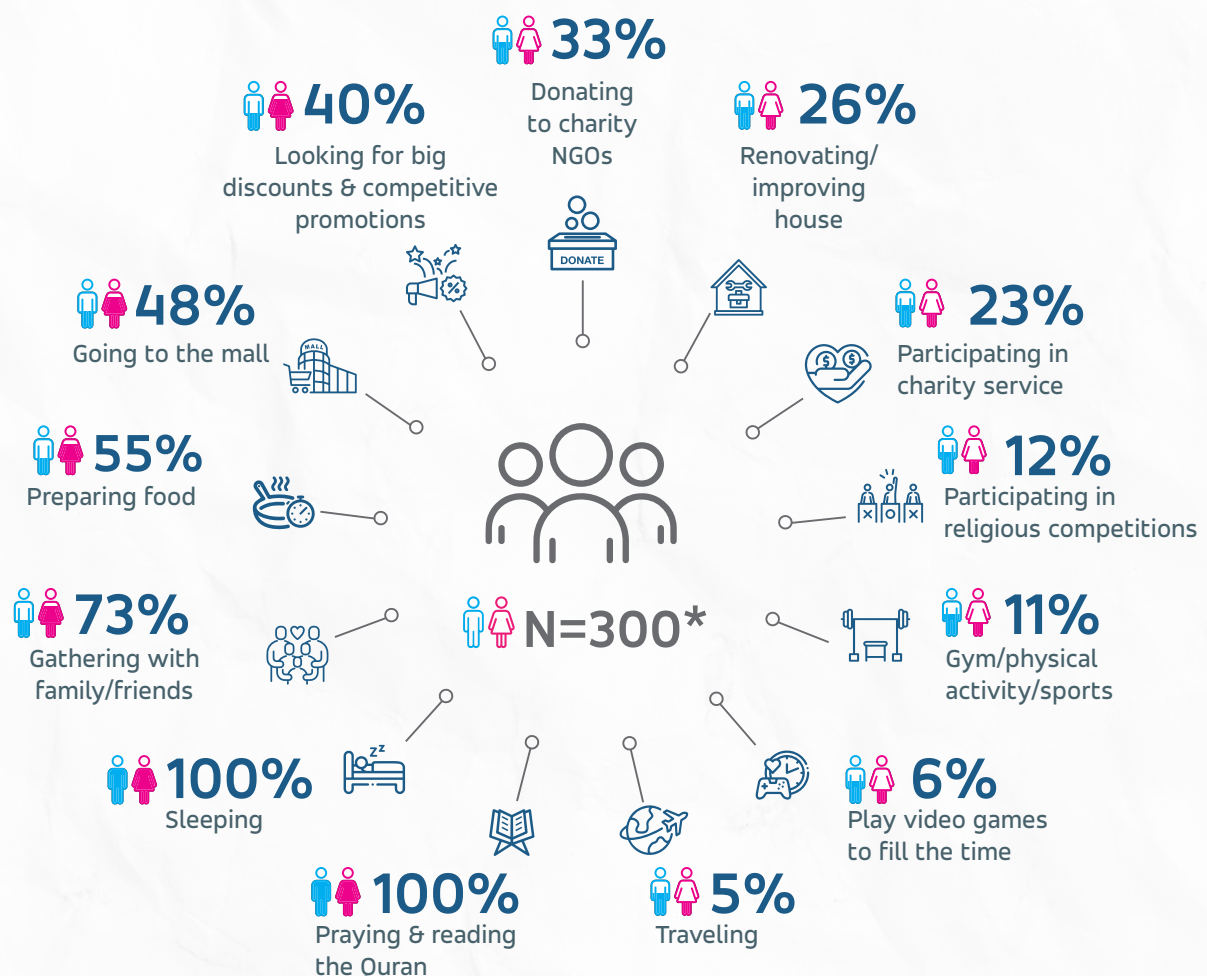

Source: SAMA (latest available data). *Shabaan is the 8th month of the Islamic calendar and represents the month before Ramadan; Shawwal is the 10th month of the Islamic calendar and represents the month after Ramadan.

- Consumer spending peaks in the month of Shabaan (the month before Ramadan).
- The first half of Ramadan is often when purchasing is lower.
- When the fasting season draws to a close and the Eid preparations begin, activity picks up again during the second half of Ramadan.
- Total weekly POS transaction values were higher in all three periods in 2022 versus 2021 (when certain COVID restrictions were still in place). Data available for 2023 so far covering the month of Shabaan and the first 2 weeks of Ramadan also point to even higher weekly POS transaction values (also higher than the same period of 2022 and 2021) as recovery from COVID continues strong momentum. Due to no restrictions in 2023, people appeared to be buying more as they prepared to socialise or host more during Ramadan.

General Behaviours during Ramadan

Activities that Respondents Spend Their Time on During Ramadan

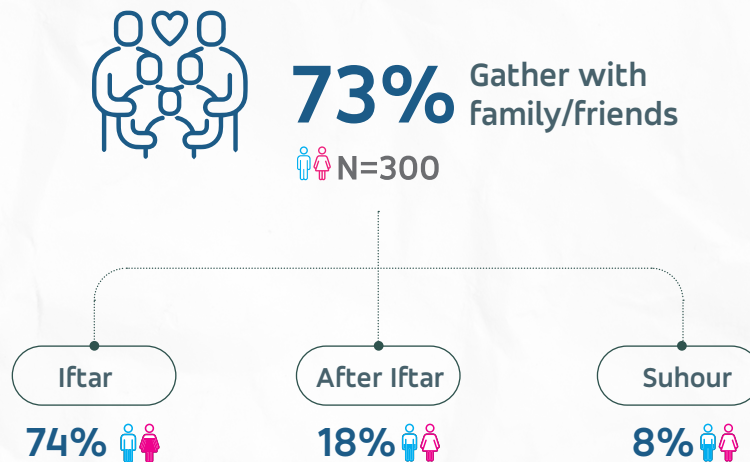

Other than praying & reading the Quran and sleeping which 100% of respondents choose to do during Ramadan, respondents prefer to spend time with family and friends (73%), prepare food (55%) and visit the mall (48%), over other activities like playing video games (6%) and traveling (5%). These behaviours were common among both Saudis and expats.

*The above activities relate to time spent doing them, while there remain 5 additional activities covered as part of this report which relate to consumer spending behaviours (page 13). These 5 remaining activities are “shopping in person” (44%), “shopping online” (18%), “entertainment” (18%), “eating out” (17%), and “ordering food/takeaway” (10%).

General Behaviours during Ramadan

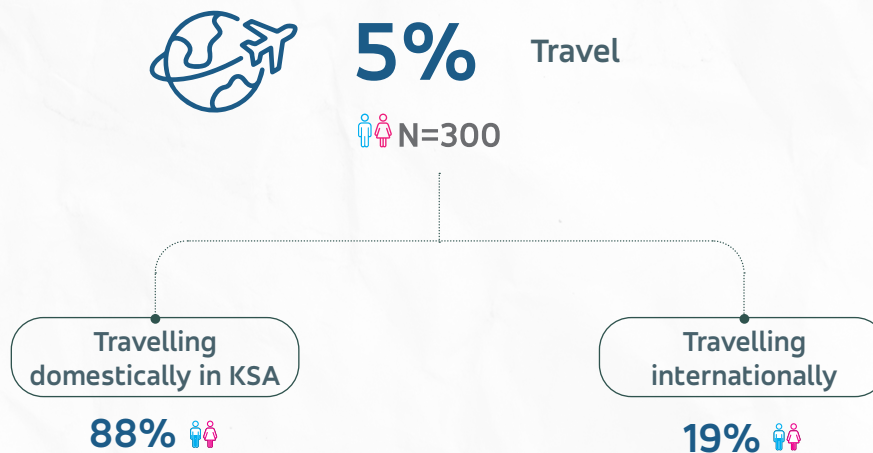

Time Spent with Family & Friends During Ramadan

Of the 73% group who generally prefer to spend time with friends and family during Ramadan, 74% prefer to gather during Iftar time.

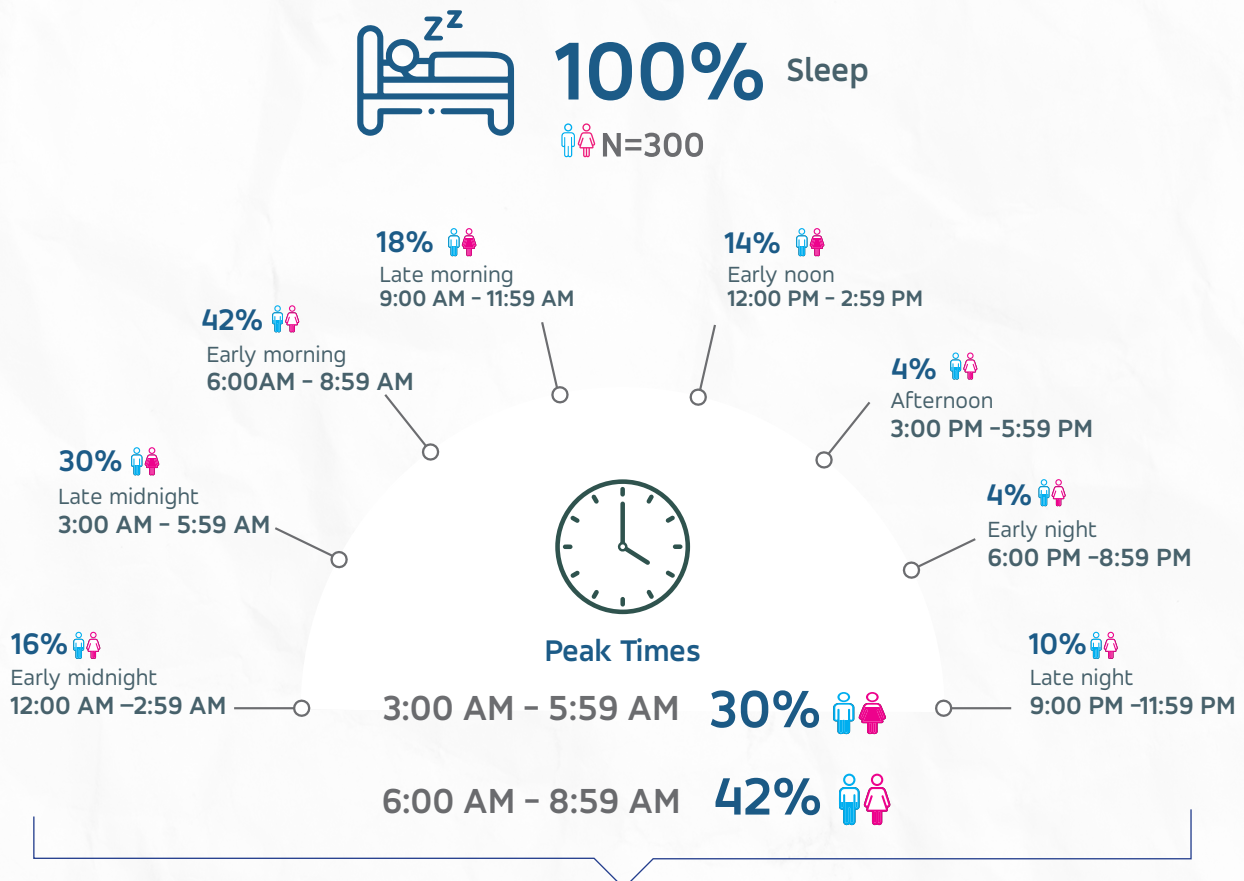

Travelling Behaviours during Ramadan

General Behaviours during Ramadan

Sleeping Behaviours during Ramadan

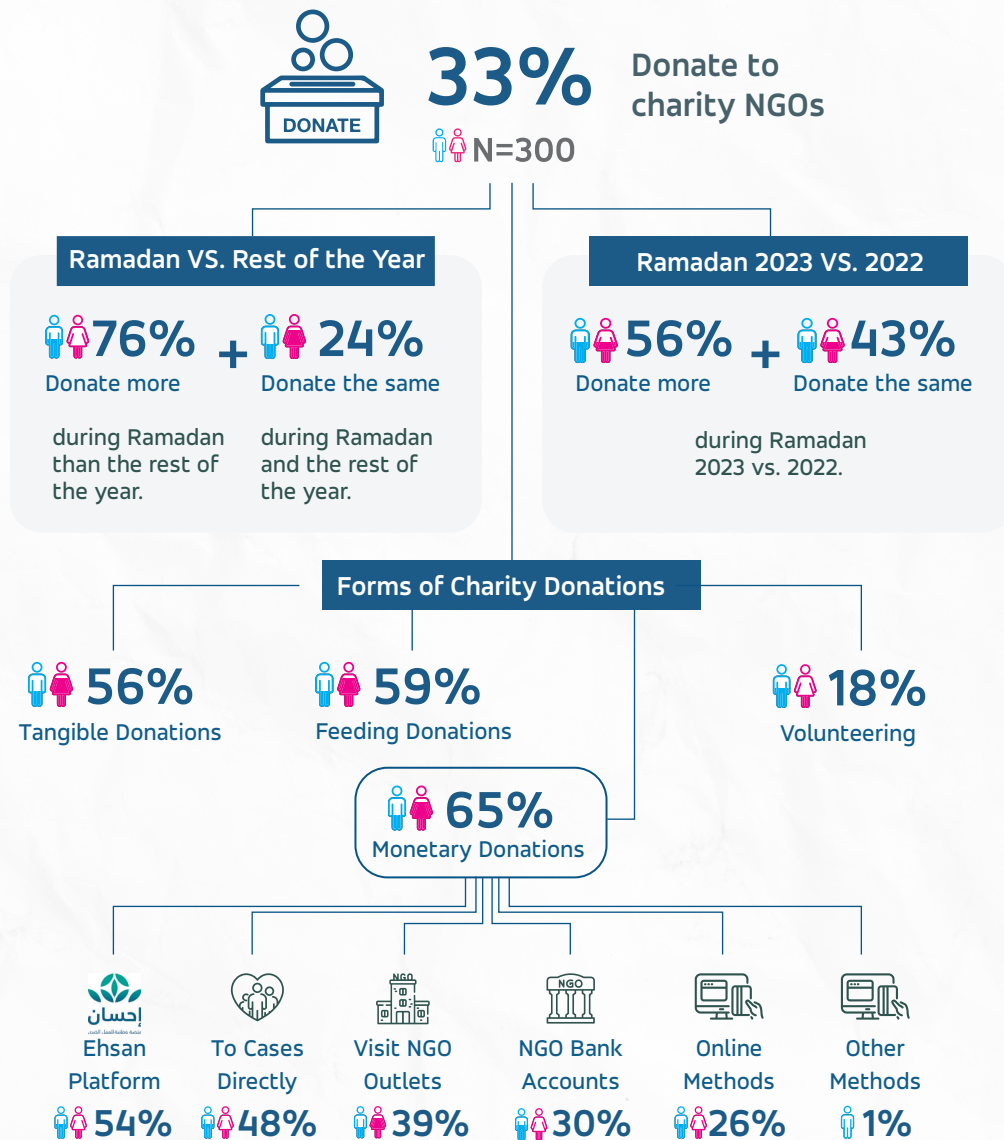

Max	15 Hrs
Average	7.1 Hrs
Min	4 Hrs

Most respondents said they get the same amount of sleep during Ramadan and the rest of the year.

General Behaviours during Ramadan

Charity Behaviours during Ramadan

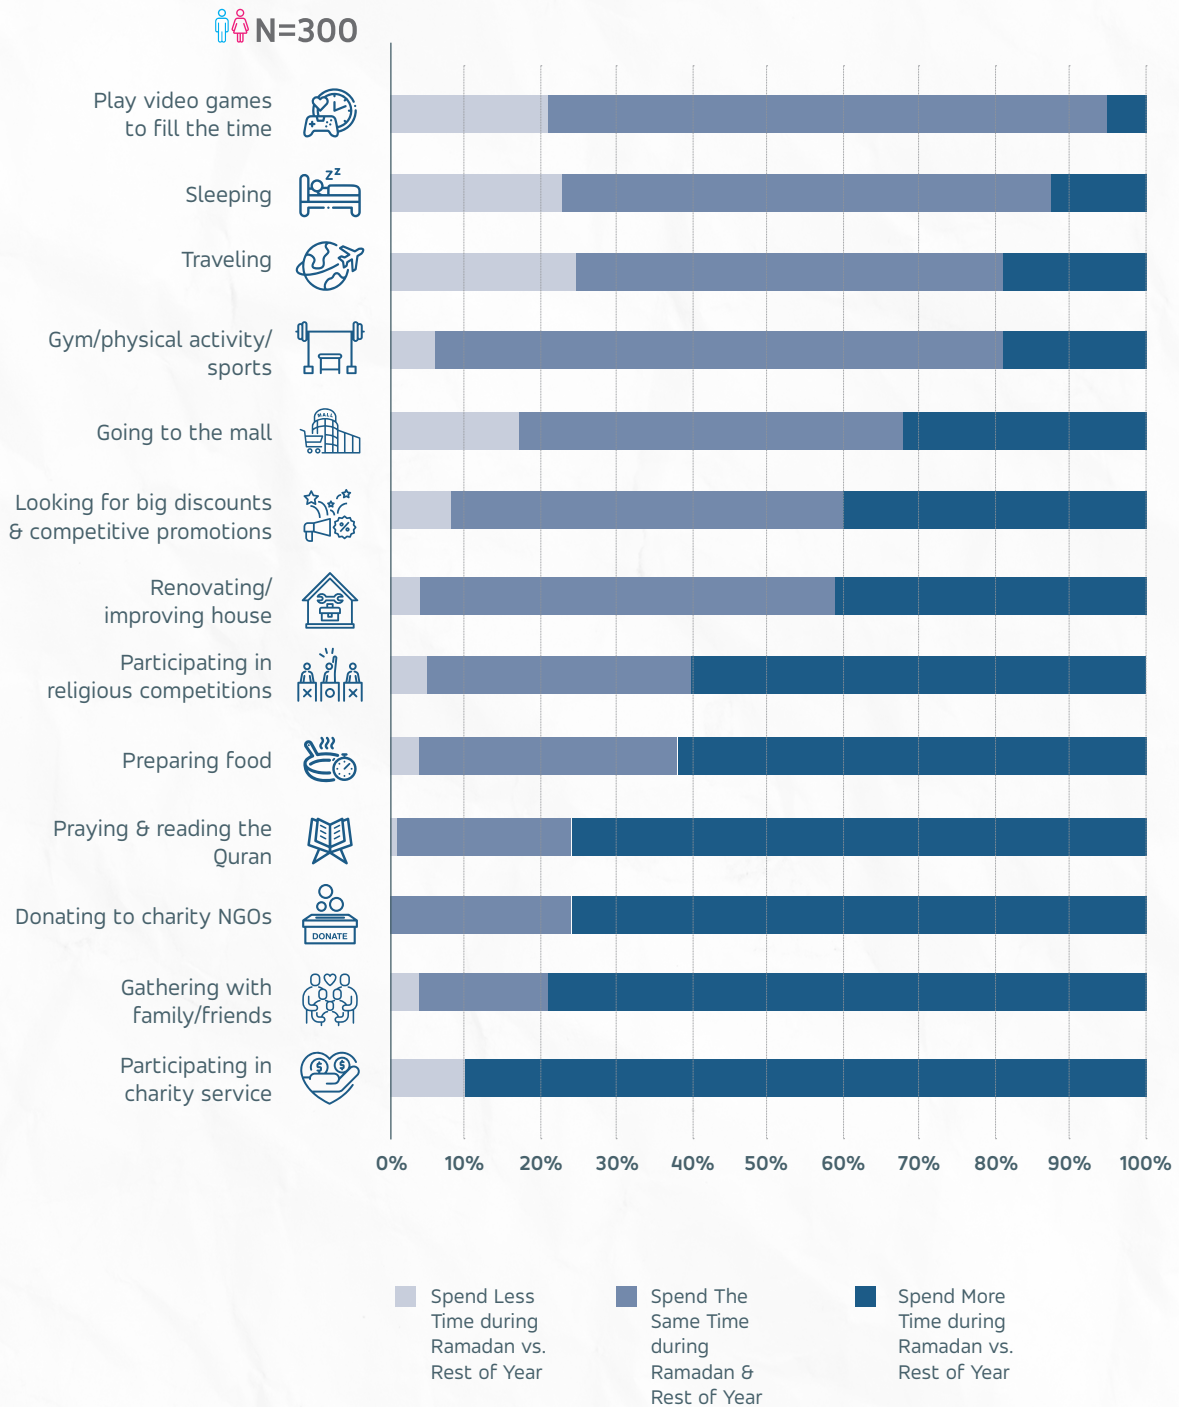

Respondents choose to donate more to charity during Ramadan than the rest of the year, and more this year versus last Ramadan. Other than Zakkat Alfitr, when it comes to participating in charity donations, the most common types of charitable giving are “other monetary donations”, and of those who make “other monetary donations”, the bulk prefer to do so through platforms such as EHSAN or donating to cases directly.

 **10%** 
Ordering food/
takeaway

Ramadan VS. Rest of the Year

 **10%**  **65%**
Spend more Spend the same

 **26%**
Spend less

Out of those in the **10%** group who indicated plans to order food during Ramadan, **65%** said they would be spending the same as they do the rest of the year on ordering food, **26%** will spend less & **10%** will spend more.

Ramadan 2023 Vs. 2022

 **13%**  **71%**
Spend more Spend the same

 **16%**
Spend less

Out of those in the **10%** group who indicated plans to order food during Ramadan, **71%** said they would be spending the same as they did for last year's Ramadan, **16%** will spend less & **13%** will spend more.

Consumer Spending Behaviours during Ramadan

% of Income Planned to be Spent By Respondents on Various Activities during Ramadan 2023

	Donating to charity NGOs 	Travelling 	Gym/physical activity/sports 	Entertainment 	Eating out 	Ordering food 	Shopping Online 	Shopping in person 	Other activities
1% to 10%	●	●	●	●	●	○	○	○	○
11% to 20%	○	○	○	○	○	●	●	○	○
21% to 30%	○	○	○	○	○	○	○	●	○
31% to 40%	○	○	○	○	○	○	○	○	○
41% to 50%	○	○	○	○	○	○	○	○	○
81% to 90%	○	○	○	○	○	○	○	○	○
91% to 100%	○	○	○	○	○	○	○	○	●

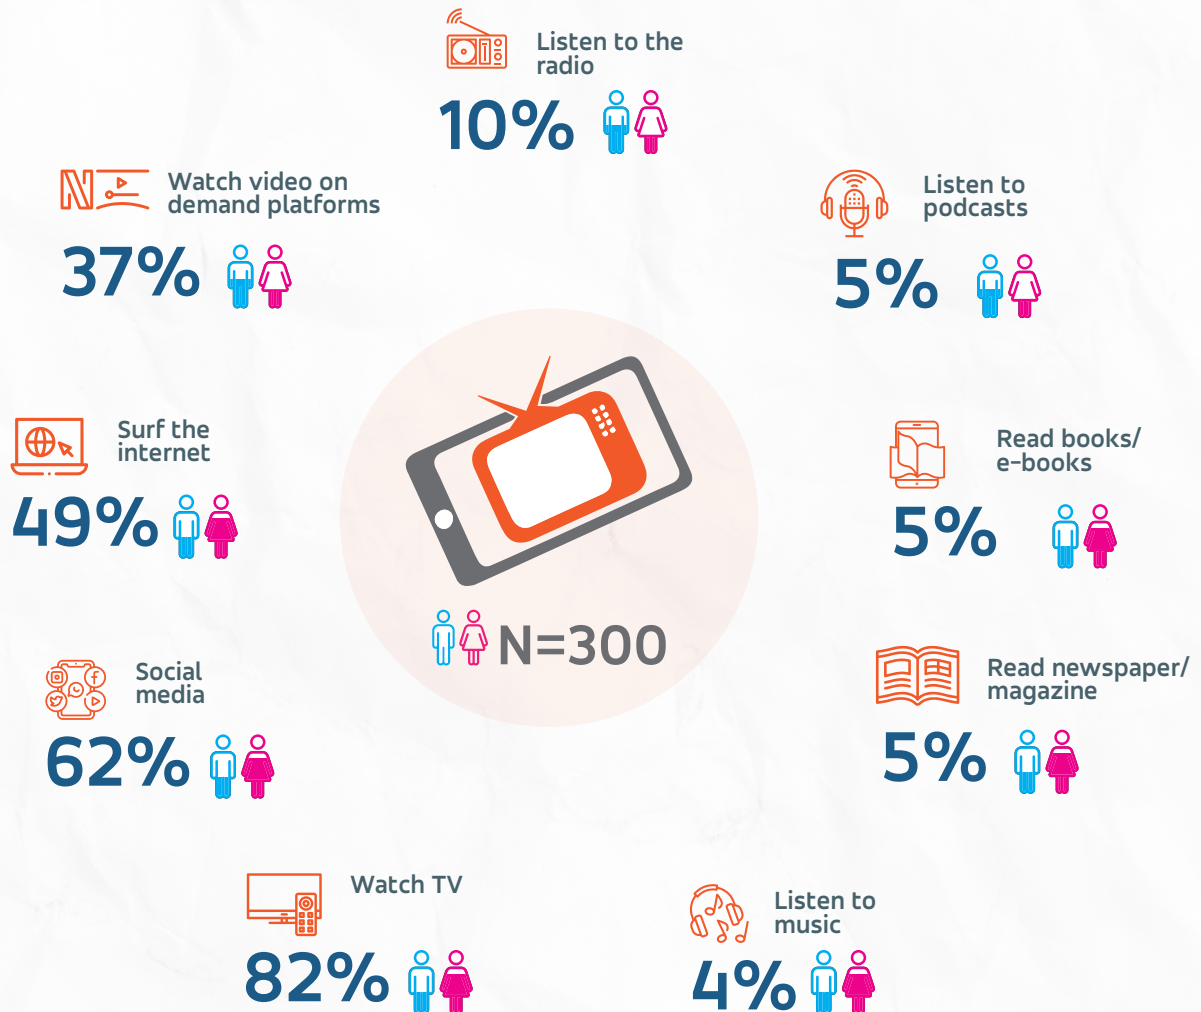

The majority of respondents plan to spend between 1% and 10% of their total income on the majority of the activities listed above during Ramadan 2023, with the exception of “ordering food”, “shopping online” and “shopping in person”, which appear to receive a larger percentage of intended expenditure of total income.

The larger portion of projected income expenditure (91% to 100%) falls under the area of “other activities”, which might include things like rent, education, etc.

Media Behaviours during Ramadan

Types of Media Consumed During Ramadan

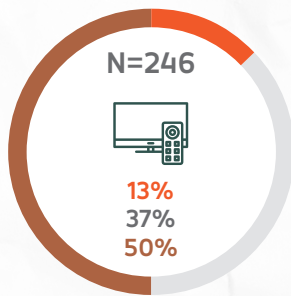

The most common media activities during Ramadan are watching TV (82%) followed by using social media (62%), surfing the internet in general (49%) and watching videos on-demand (37%).

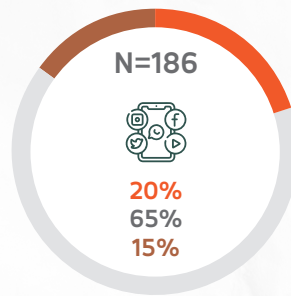

Media Behaviours during Ramadan

Consume Less during Ramadan vs. Rest of Year

Consume the Same during Ramadan & Rest of Year

Consume More during Ramadan vs. Rest of Year

Media Behaviours during Ramadan

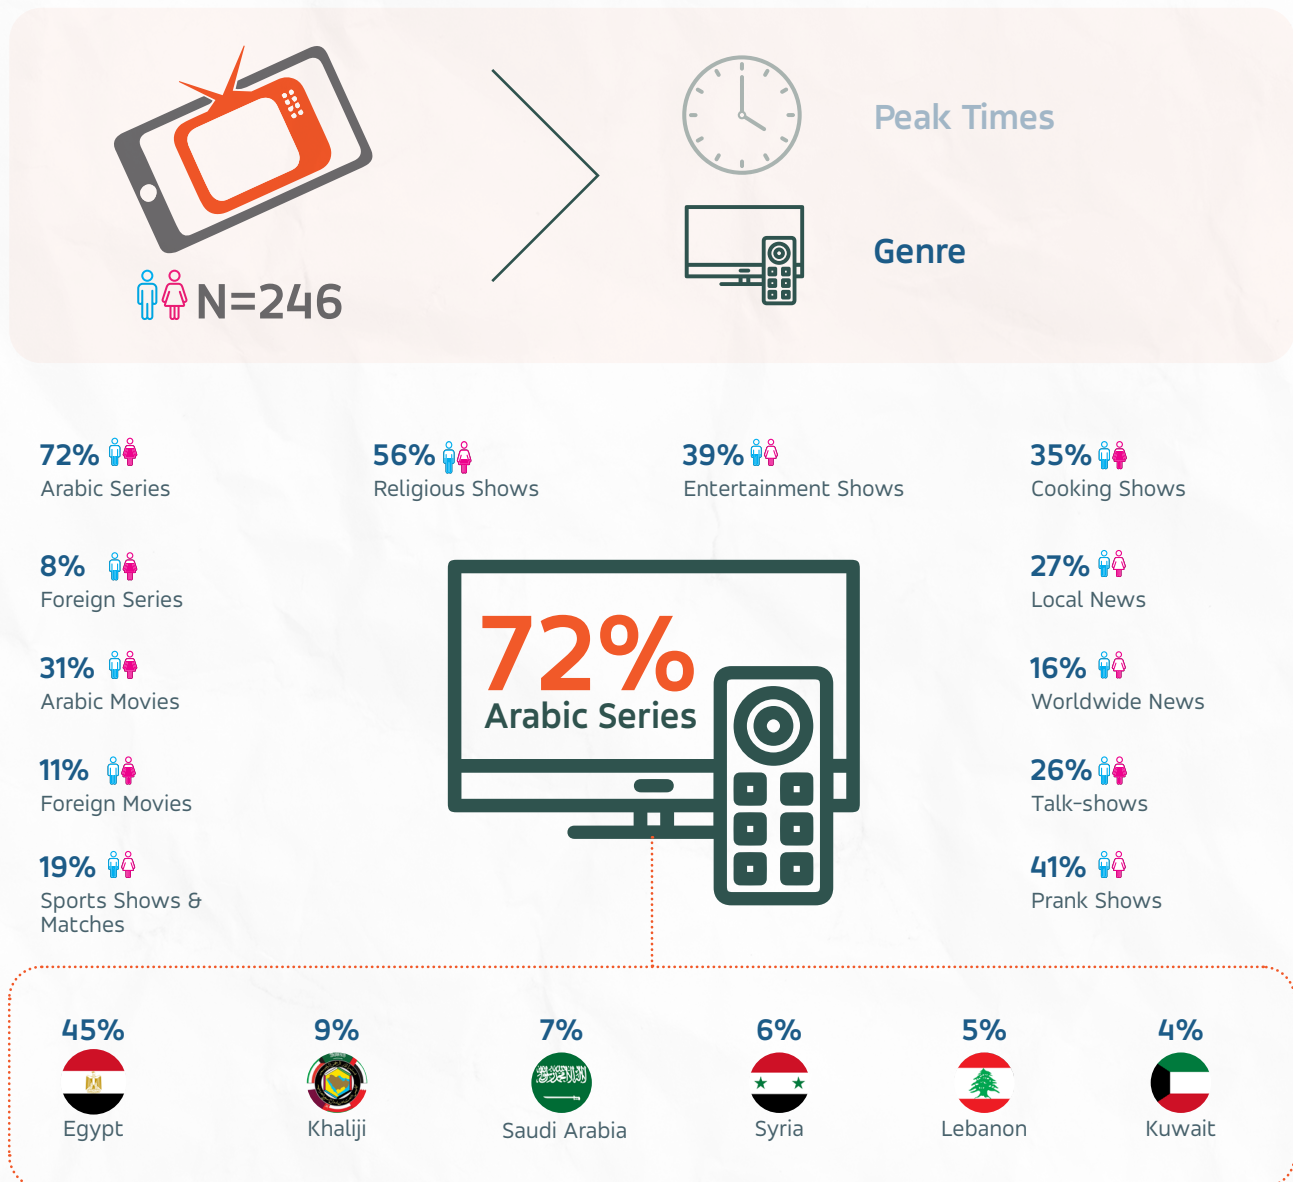

TV Consumption during Ramadan – Peak Times

The hours between early evening (6:00 PM – 8:59 PM) are peak time when most respondents watch television during Ramadan.

Media Behaviours during Ramadan

TV Consumption during Ramadan – Genre

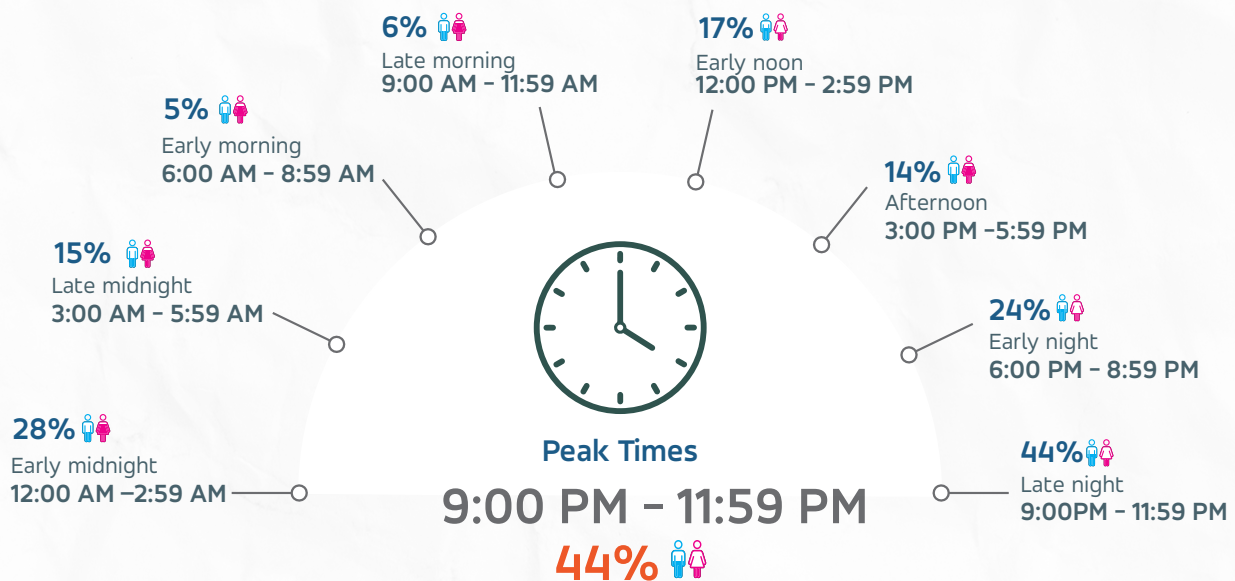

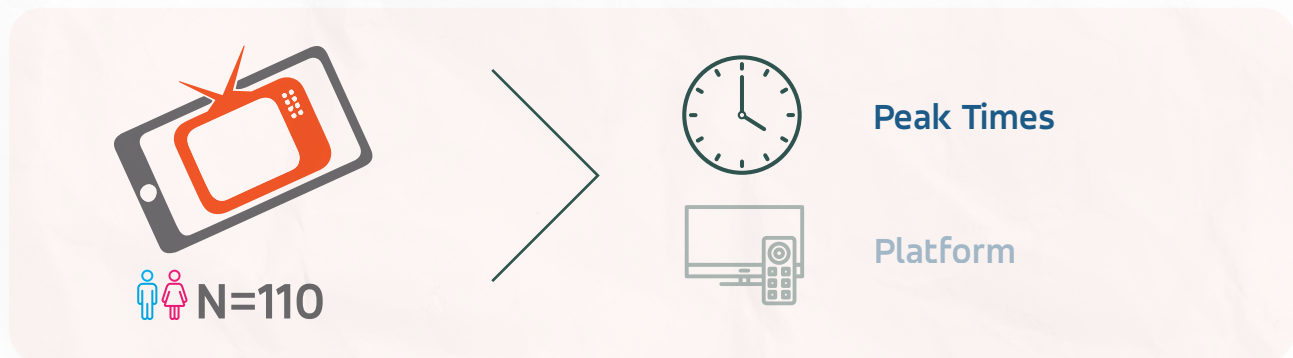

The most popular genre that the respondents who watch TV said they watch is Arabic series (72%), particularly Egyptian ones (45%), watched more by females. The second most popular TV genre is religious shows (56%), watched equally by males and females.

Media Behaviours during Ramadan

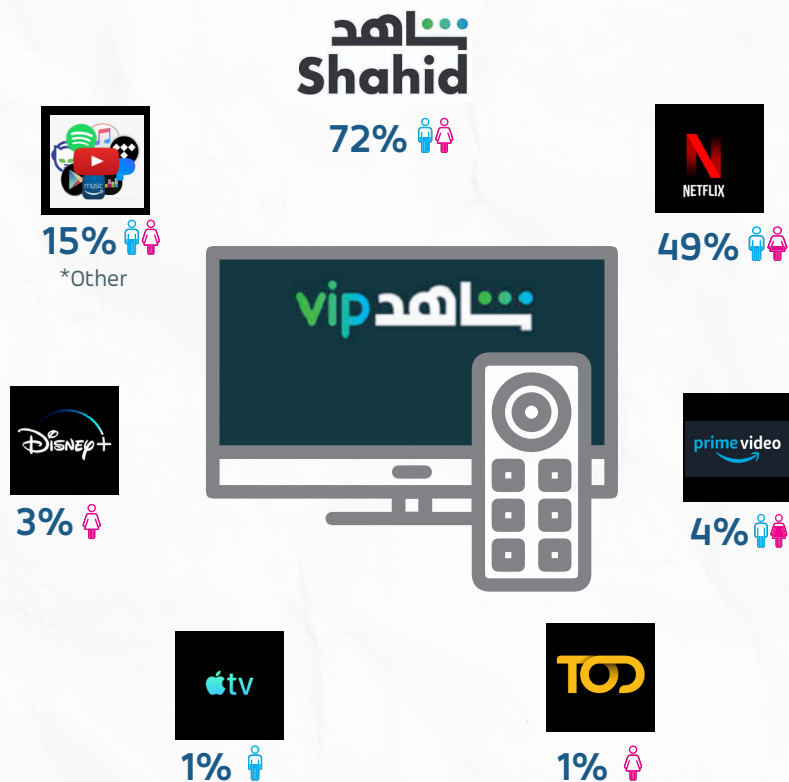

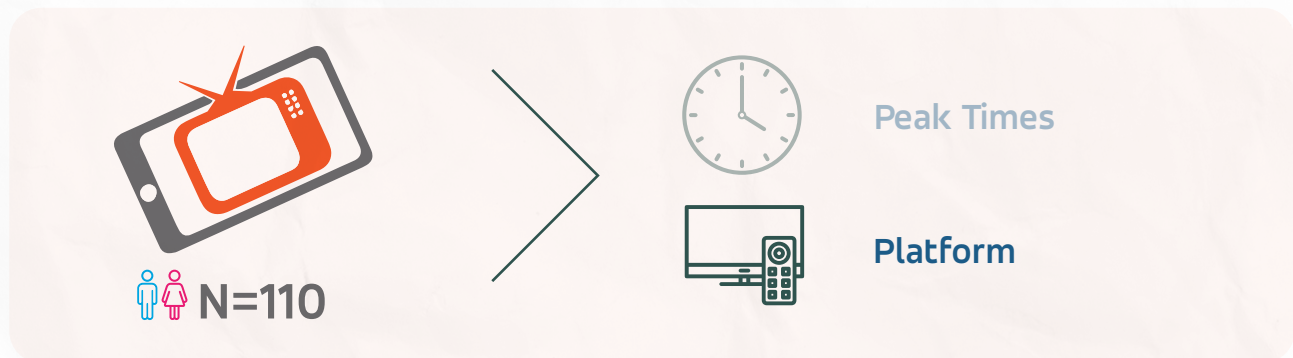

VOD Consumption during Ramadan – Peak Times

VOD viewing peak window is between the late night hours of 9pm to 12 midnight.

Media Behaviours during Ramadan

VOD Consumption during Ramadan – Platform

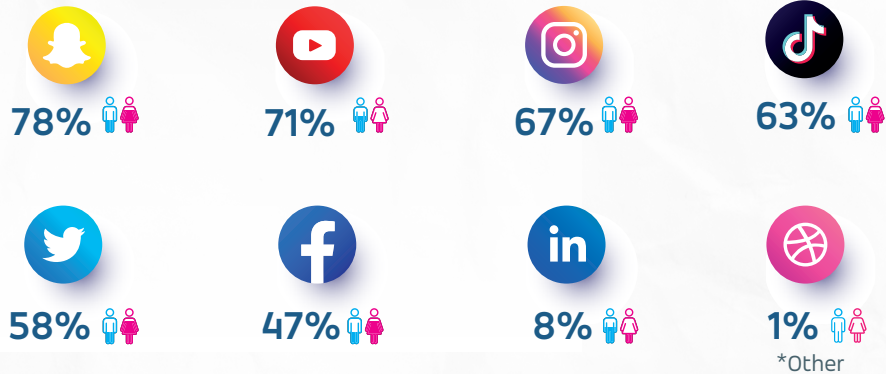

Shahid (72%) is the most common VOD platform used followed by Netflix (49%).

Media Behaviours during Ramadan

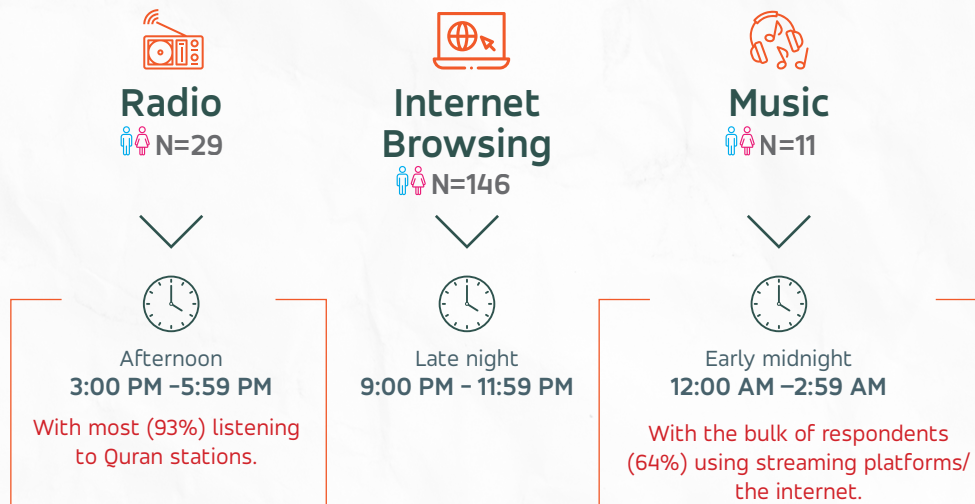

Social Media Used during Ramadan

 N=211

Snapchat is the most popular social media platform among those respondents who use social media during Ramadan.

Other Media Used during Ramadan

Other media consumed during Ramadan include listening to the radio, browsing the internet, and listening to music. The peak times when such media are consumed vary.

Conclusion

Based on the data of this year's study, our in-house economic and market research experts have found that:

- Consumers are spending more in 2023 vs. 2022 as well as more than 2021.
- Ramadan season's spending peaks at two instances (a) 2 weeks before Ramadan and then (b) 1 week before Eid.
- The day shifts a bit in Saudi Arabia, with sleep time moving to around 3am, as well as a later start to the work day.
- Consumers pray more, indulge in charity and socialize more than the rest of the year. This year in specific, consumers are socializing more than in 2022, which may be driven by the absence of COVID restrictions vs. last year.
- Consumers are spending more on groceries and clothing this Ramadan versus the rest of the year. This may also be driven by the removal of COVID restrictions leading to more socializing. Interestingly men are more prone to promotions, while women prioritize quality during their purchases.
- Viewing habits also change during Ramadan; consumers prefer to watch Egyptian Arabic series on TV around Iftar and Isha (6pm to 9pm) and prefer to watch Shahid video-on-demand from 9pm to midnight.

Keeping the above in view, for Ramadan 2024, our experts recommend the following to businesses across the Kingdom seeking to capitalise on Ramadan consumption:

- Consider Ramadan as a season panning 6 weeks, which includes the last two weeks of Shabaan and 4 weeks of Ramadan.
 - Start rolling out promotions 2 weeks ahead of Ramadan. While promotions target males (who consider this the top factor when buying a product); highlighting the quality of products targets females.
 - Start being mindful of Muslim and Saudi-specific customs and culture while deciding what messages to convey in advertising campaigns during Ramadan season.
- During Ramadan, the day shifts and viewing preferences also shift.
 - Schedule targeted advertising campaigns on TV between 6pm to 9pm when viewing is at its peak.
 - Allocate media spending to VOD channels also and spend the money during the 9pm-to-midnight time slot.
 - Since consumers frequently remain up late and are interested in clothing and other products, use late hours to target them through e-commerce platforms.
 - Unlike other countries, in Saudi Arabia, Snapchat is the top channel. Use it with Ramadan-specific filters and lenses to enhance brand engagement and recall.
 - Offer domestic travel packages to key destinations like Jeddah, Madina and other big cities as people travel more for Umrah and to visit families across the Kingdom.

Appendix

Strategic Gears Case Studies

Below are case study examples of market research and economic studies that Strategic Gears has completed for Saudi Arabian public and private sector clients.

These case studies provide examples of how Strategic Gears conducted various types of exploratory research to gather ideas and insights about a problem or formulate a hypothesis, obtain thorough in-depth feedback and insights on "WHY" a certain response was given, and reach respondents who fully represent society. These methods included phone surveys and face-to-face interviews (as opposed to social media polls and other tools).

CASE STUDY 1

Assessing the Impact of the Expat Levy in Saudi Arabia on Consumption, Labour Outflow & the Wage Gap

Background

As the Saudi government considered raising the expat levy in the Kingdom, Strategic Gears conducted qualitative and quantitative research to:

1. Analyze the expat levy impact on expat consumption, and its effect on the economy of Saudi Arabia.
2. Evaluate the expat levy's impact on their decision to stay in the country or not.
3. Identify the change in the wage gap between the Saudi and the expat labour as a result of the levy.

Our Approach

- Quantitative research was conducted which included a survey of over 1,500 participants from households and about 80 local companies to find out how will they react to the expat levy raise.
- Qualitative research (including 8 mini groups and 10 in-depth interviews) was also performed to verify the quantitative analysis and capture the pain points.
- The team also created an automated calculator to estimate generated revenue based on 6 variables: aggressiveness, sectors, duration, expat category, economic growth, and expat labour growth rate.
- The project also involved identifying the change in the Saudi and expat wage gap by sector as a result of the levy.

The Impact

- Estimated the number of expat outflow from Saudi Arabia. This estimated number was accurate as the actual numbers revealed in 2018.
- Estimated the impact of the levy on consumption and highlighted the most impacted sectors from that.
- Provided key insights on the change in Saudi and expat labour force wage gap by sector.

Strategic Gears Case Studies

CASE STUDY 2

Gauging the perceptions of locals with distance learning in Saudi Arabia

Background

While distance education (learning) has had significant advancements since the 1980s, the COVID-19 pandemic pushed it into the limelight practically overnight, forcing most public & private educational institutions worldwide to rapidly employ it on a full scale at all education levels.

Strategic Gears presented a comprehensive report identifying and evaluating the challenges and opportunities of the distance learning systems employed in Saudi Arabia, particularly across the K-12 education system.

Our Approach

A survey was conducted at the beginning of November 2020 to gauge perceptions of locals (parents and students) with distance learning in four different clusters of effectiveness identified, targeting 3 segments:

- **Parents (P):** Parents of primary/intermediate school children (n = 154)
- **Parents (S):** Parents of secondary school children (n = 103)
- **Students (S):** Secondary school children (n = 135) (with permission from their parents)

This was an initial analysis and served as a starting point for further research and corrective implementation.

The Impact

The research concluded that a considerable fraction of the survey respondents wish to see the return of in-person, physical schools. However, they are open to distance learning supplementing traditional education through hybrid learning.

This finding has offered considerable implications for regulators, teachers, parents, and students – with a subtle nod of approval towards the evolution of the educational landscape in the future. The research concluded with recommendations for targeted interventions to maximize the effectiveness of the educational process.

Appendix

Strategic Gears Case Studies

CASE STUDY 3

Understanding Investors' Behaviours & Motivations in Saudi Arabia

Background

Strategic Gears conducted research to

1. Study the motivations of Saudi investors, in order to analyze their investment decisions.
2. Understand the behaviours of Saudi investors in order to develop appropriate communication strategies.

Our Approach

- Studied all possible investment channels in Saudi Arabia and the motivations of investors in Saudi Arabia. The process of research involved 4 phases:
 - Internal kickoff meetings with relevant stakeholders
 - Qualitative research to understand the investment dynamics in Saudi Arabia
 - Quantitative research of all investment habits and clustering of segments
 - Ideation & way forward strategy workshop.
- The snowballing recruitment methodology was used to reach the target most efficiently. Target respondents were recruited following a pre-determined screening in order to check respondents' eligibility.

The Impact

- Segmented the targeted audience into 4 main segments, based on their investing behaviours.
- Understanding of investor motivations allowed for a better understanding of the targeted audience, hence facilitating the development of tailored strategies.

Appendix

Strategic Gears Case Studies

CASE STUDY 4

Estimating the Size of Tassatur (Concealed Ownership) Businesses in the Saudi Economy & Developing a Mitigation Strategy

Background

Strategic Gears conducted a study which aimed at:

1. Designing a methodology which can be used periodically to estimate the size of tassatur businesses in the Saudi economy.
2. Analyzing the main drivers and barriers to the formalization of tassatur businesses.
3. Developing a mitigation strategy to tackle the unique phenomenon and improve value add to the Saudi economy.

Our Approach

- Identified and analyzed international methods to measure the informal economy in different parts of the world before developing a modelling method catered to the Saudi context, validating it with 12 of the country's premier public apparatuses.
- Conducted on-ground qualitative research with businessmen to understand their status quo and barriers to formalization.
- Using insights from the model, the interviews and the research, the team developed catered mitigation strategies on the sub-sector level.

The Impact

- Implemented the first iteration of the model to generate the most accurate estimate of the size of Tassatur businesses in the Saudi economy.
- Identified challenges and barriers to formalization on a sub-sector level.
- Recommended a strategy to effectively mitigate tassatur and add value to the economy.

Strategic Gears Case Studies

CASE STUDY 5

Understanding Travellers and General Public Behaviours in Saudi Arabia

Background

Strategic Gears worked on a study aimed at:

1. Developing a comprehensive understanding of the general public and their needs in transportation.
2. Developing a better understanding of the current customers of the concerned client.

Our Approach

- Qualitative research to understand the drivers towards travelling as well as methods of travelling.
- Quantitative research with a sample of over 1400 people including transport users (customers) and the general public to capture answers on users' trips and their usage habits and to evaluate the concept of travelling in general as well as overall transportation in Saudi Arabia including barriers and drivers.

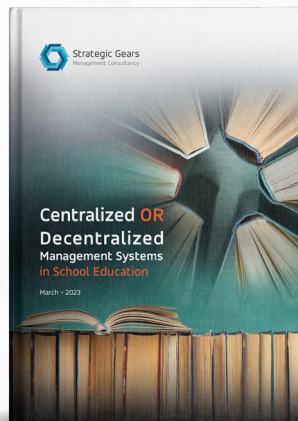

The Impact

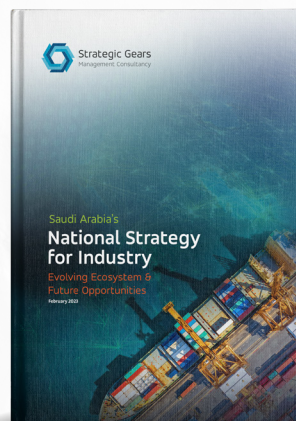

- Clear understating of the current perception and awareness of travellers about the client and their travelling barriers and drivers.
- Segment the client's users into 3 main segments to develop a communication strategy.

Other Publications

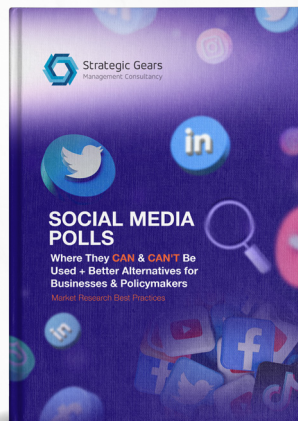

Strategic Gears prides itself in its ability to be a knowledge hub for the Saudi market. We release a range of reports on the current state of the Kingdom's economy as well as hot topics in both the public and private sectors. Below is a sample of our latest publications.
